# Ruff-IN
pre-fabricated solutions

F·A·T·O·N

Powering Business Worldwide

Ruff-IN™ prefabricated electrical assemblies are backed by a full commercial product offering designed for **dependable performance & productivity**.
The portfolio delivers the quality and breadth of offering in styles and materials to meet customer requirements and preferences. With industry-leading innovation, our products deliver real customer value.

Industry challenges impact your bottom line

Demands of electrical contractors are at an all-time high.

Incredibly tight budgets paired with scope creep, digital deliverables, and green building initiatives like waste reduction create unique opportunities and challenges for nearly every project.

Pairing these challenges with a shrinking workforce and expedited construction schedules requires contractors to optimize labor in new ways.

Productivity challenges hit hardest at rough-in.

Inefficient material management and slow installation when working in ceilings and walls is costly.

Contractors need efficiency and consistency to get it done right and quickly. Eaton is here to help.

"Does anyone know where the mud rings are?"

Introducing Ruff-IN solutions

- Ruff-IN is our extensive portfolio of innovative, pre-fabricated in-wall and overhead electrical assemblies

- Our Ruff-IN pre-fab solutions save on time and help reduce costs for a healthier bottom line

- Ruff-IN supports your needs for standardization, installation speed and optimization of your work force
Turn rough-in into a win!

- **Reduce** material management
- **Speed up** installation
- **Optimize** skilled labor

Ruff-IN your way!

Ruff-IN is available in multiple tiers, from simple assemblies to a complete engineered solution for a project. Choose the Ruff-IN solution below that best fits your needs, job-by-job or driving towards a standard solution. Contact our team for guidance toward the solution that best fits your project.

1. Ruff-IN Made-to-Stock - standard assemblies

- Our most common and popular pre-fab assemblies
- Helps reduce material management costs and eliminate assembly for all your work
- Factory assembled and available for immediate shipment from stock

> **If you're building assemblies yourself, consider our pre-fab optimized components like Quick-Lok™ and BBT series brackets.**
2. Ruff-IN Made-to-Order - configured assemblies

- Configured according to your specific project type and schedule, optimizing labor usage and maximizing installation speed
- Assembled from our extensive line of brackets, boxes, plaster rings, wiring devices, push-in connectors, cable leads, and other branch wiring accessories
- When you establish standard assemblies, your MTO assemblies become your standard, and we'll work with distributors to stock them for you

3. Ruff-IN Engineered-to-Order - fully engineered solutions

- Complete turnkey solution that begins with a free takeoff based on the construction documents. When a PO is awarded, a complete Revit model will be created to design the pre-fab solution.
- Revit model can be shared to help with trade coordination and serves as owner-as-built drawing once completed.
- Fully engineered to the project requirements using a 15+ year proven system, delivering a fast and consistent installation to optimize labor.
- Ideal for highly repetitive projects like apartments, dormitories and hotels.

3. Ruff-IN Engineered-to-Order solutions

How you save with Ruff-IN fully engineered solutions

- Eliminate time-consuming job site "engineering"
- Eliminate spot buying and excessive material handling
- Eliminate job site material "piles" and wasted time searching for pieces and parts
- Reduce material overages and scrap, including expensive wire and cable
- Speed installations and improve project savings
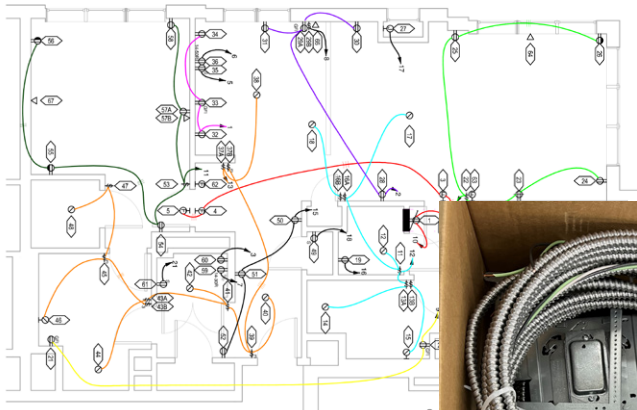

8 Minutes

Estimated time saved per assembly by rough-in crews on a typical hotel over traditional "stick-build" wiring methods

3. Ruff-IN Engineered-to-Order solutions

Engineered-to-Order solutions are used in commercial buildings such as hotels, condominiums, dormitories, retail offices, hospitals and apartments, where the **architectural design is typically repeated from room to room**.

Our experienced engineering team will work with you to plan and design the exact requirements for your next big project. We'll provide:

- **Dedicated project management**, local sales and distribution support
- **Expert recommendations** on the products and assemblies that best fit your project and align to your preferred installation methods
- **Digital integration** – We can incorporate our design data right into your software plans, further streamlining material management and job complexity
- Assemblies include **custom labels** and are **kitted, and shipped with detailed drawings** to simplify handling and speed installations
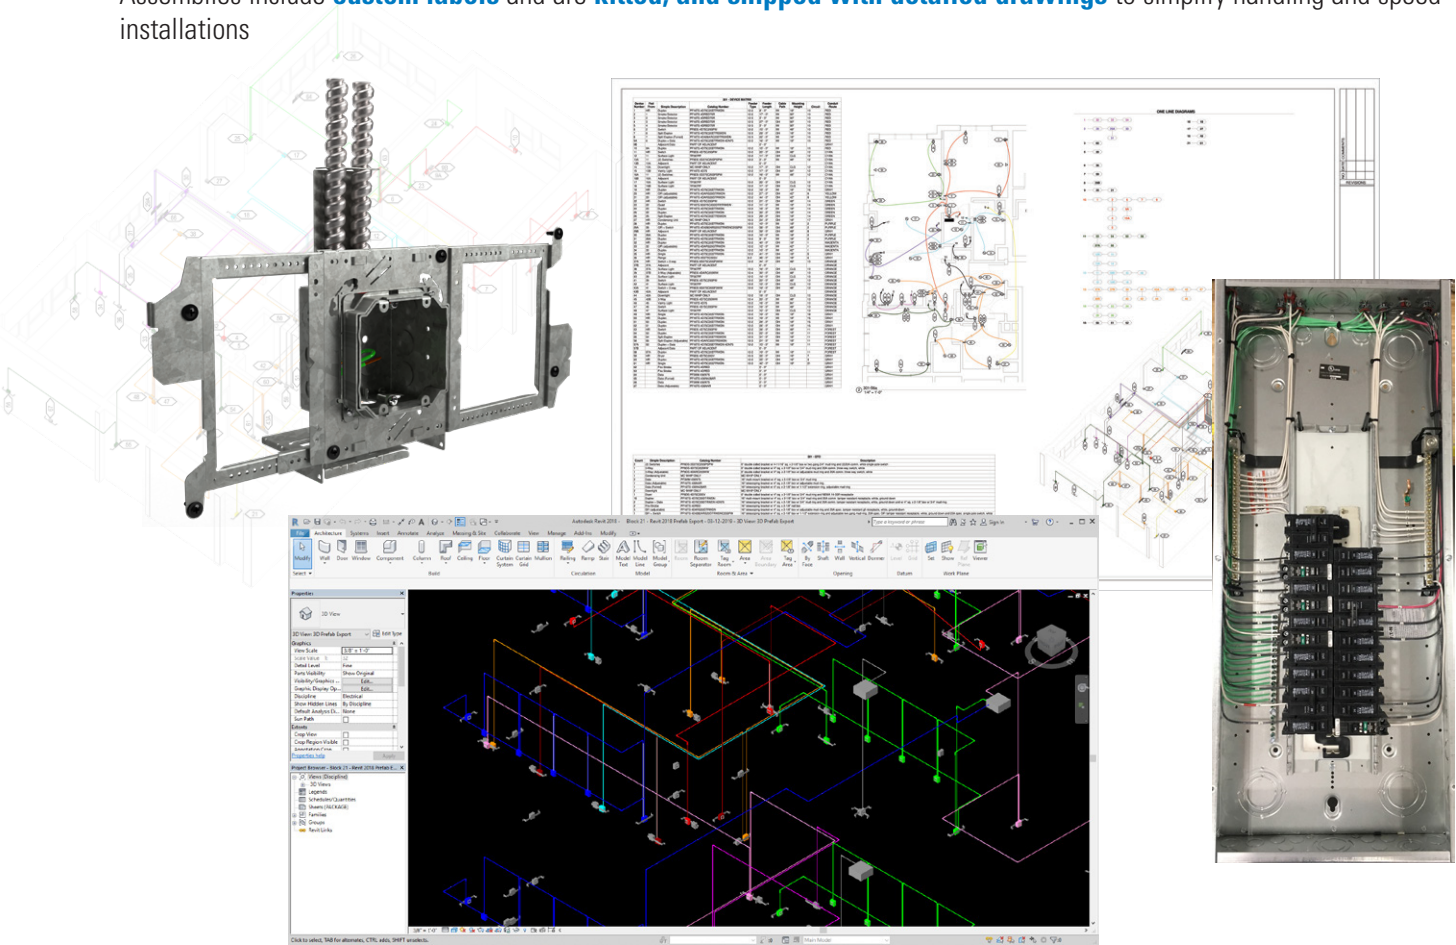

Experience and agility to manage change

We understand that **unexpected change** occurs on large commercial projects – changes that can come at you fast and are beyond your control. Whatever the obstacle, we'll work with you to make the necessary modifications for future assemblies and keep your project on track and on time.

Ruff-in solution overview

Telescoping brackets

With an auto-height adjustment, the rigid BBT-HF telescoping bracket is quick and easy to install. Simply slide the bracket to the width required and snap both ends of the bracket to the stud and secure with screws.
Telescoping bracket

① With bracket fully collapsed, align next to stud with right side at the floor.

② Install sheet metal screw into pivot point.

③ Rotate bracket around the installed screw at the pivot point.

④ Expand bracket, snap to stud and affix with screws. Center line will be 18" AFF.

Features

- Easily adjust to accommodate stud widths of 14½" through 25"; a secure fit at all stud spacings

- Available in BBT-16 for 9¼" thru 16½" stud spacings

- Bracket includes an auto-height adjustment feature

- Self-leveling when snapped onto stud; no need for additional leveling tools

- Easy to identify center line on both sides of the bracket

- Snap-on feature works on 1¼" through $1^3/_8$" inch width studs

- For studs wider than $1^3/_8$" utilize the BBT-WF

- Designed to mount boxes at the exact height on either side of the stud without overlap of adjacent brackets

- Continuous hole pattern allows for positioning of the box mounting bracket anywhere along the length of the bracket

- UL Listed for U.S. and Canada; CSA certified

Patent pending (all parts)

BBA-MG

Features

- Marty Mouse™ ears to retain the box when plaster ring is removed
- Rabbit Ears™ to attach a plaster ring for data devices without using a box
- Accepts 4", 4$^{11}/_{16}$" and 5" square box sizes
- Built-in, snap off back support extension for studs from 2.5" to 6" studs
- No need to measure additional box heights – features interlocking brackets to easily and quickly mount boxes side-by-side
- Faster daisy chain boxes; two brackets mount to the same side of the stud
- Works with standard or adjustable mud rings and Rapid Ring self-adjusting pre-fab ring
- Use with BBT-HF or directly to stud
- BBA-MG bracket supports boxes in ceiling or wall
- BBA-MG UL is listed for multiple gang box
- BBA-MG is ideal for fire alarm speaker strobes and nurse call stations in hospitals
- UL Listed for U.S. and Canada; CSA certified

Patent pending (all parts)

Advantage of B-Line series brackets

No need to measure box heights with interlocking brackets

Mounting boxes side-by-side has never been easier.

- Designed to mount two boxes at exactly the same height on either side of the stud.

No box needed for DataComm accessories

Innovative rabbit ears make it possible.

- Rabbit Ears and mud ring allow data communication devices, such as card readers, to be attached to the bracket without the use of a box.

One SKU mounts multiple box sizes - fewer parts to handle on the job-site

Built-in back support accessory for job-site flexibility.

- Bracket accepts 4", 4$^{11/16}$", and 5" boxes.
- Bracket extender easily snaps off of the bracket to snap into place as a back support for up to 6" stud depths.

Faster daisy chain boxes

Faster installs with B-Line series solutions.

- Two brackets mount to the same side of a stud at the same height.

Ruff-in solution overview
Quick-Lok outlet boxes and assemblies

More space and options

- UL Listed
- Large 44 cubic inch capacity for the entire $4^{11}/_{16}$" square offering
- 33.3 cubic inch capacity for entire 4" square offering
- Extra $1/_2$" and $3/_4$" eccentric knockouts available on select models
- Ground bump available on all models
- Pre-installed pigtail provided as an option on all models

Easy to mount

- Patented S-curved shape allows for two brackets to be interlocked and mounted side by side on same stud
- Available with single or double sided options
- Assemblies without flat face bracket can be installed in conjunction with B-Line series stud mounting brackets

Patented pre-installed external connectors

- 4" square:
  (2) top only cable entries or (2) top & (2) bottom cable entry options
- 4-11/16" square:
  (2-4) top only cable entries or (2-4) top & (2-4) bottom cable entry options
- Extra $1/_2$" and $3/_4$" eccentric knockouts available on select models
- Integral insulator and easily removable knockout plug

Ruff-in solution overview
## Quick-Lok outlet boxes and assemblies

Step 1. Mount box to stud.

Step 2. Pop out the plug by inserting a screwdriver through the top of the Quick-Lok connector in the location where cable will be installed. If you accidentally pop out too many plugs, you can reinstall.

Step 3. Align the cable openings on the cable management with the top of the Quick-Lok connector.

Step 4. Insert cable through the cable management and Quick-Lok connector simultaneously.
Step 5. Slide cable management up and snap into the box and Quick-Lok connector after all cables are installed.

Note:
For type MC-I cable *(Southwire MCAP, Encore Smartground, or similar)*, the bare aluminum ground should be wrapped against the outside jacket and protrude from the top of the Quick-Lok connector $1/8$". Any excess will be cut off.

Eaton.com/Quick-Lok

Box mounting brackets

Quick installation

- BBA easily snaps onto BBT telescoping brackets and accepts 4", $4^{11}/_{16}$" and 5" box sizes

- Marty Mouse ears retain the box when plaster ring is removed

- Rabbit Ears to attach a plaster ring for data devices without using a box

Application versatility

- BBA-2 and BBA-4 come with backside support; both can be stud mount or installed in the BBT bracket

- BBA-2 is designed specifically for $2^1/_2$" deep studs without modification

- BBA-4 features built-in, snap off back support extension for studs from 2.5" to 6"

- No need to measure additional box heights – features interlocking brackets to easily and quickly mount boxes side-by-side

- Faster daisy chain boxes; two brackets mount to the same side of the stud

- Works with standard or adjustable mud rings

BBA-MG features

- Bracket supports boxes in ceiling or wall

- UL Listed for multiple gang box

- Ideal for fire alarm speaker strobes and nurse call stations in hospitals

BBT-WF	Telescoping box bracket for wide flange studs	14½" - 25"	25

Patent pending (all parts)

Ceiling clips for BBT brackets

- Installs onto BBT-WF with two screws for installation into T-Grid ceilings
- Box attached with BBA or BBA-4 alignment bracket
- Wide support prevents bracket from rocking, and rigidity of BBT-WF reduces pressure on the ceiling tile
- Sheet metal screw location and loop hole for support drop wire aids compliance with NEC 314.23 (D)
- Install fire alarm boxes, nurse call, lighting controls, etc. into the ceiling grid using the same brackets installed in the wall, reducing overall SKU count
- Install multiple boxes into the same ceiling tile
- Static load capacity 50lbs.
- Available for field or prefab shop assembly, or preassembled on a BBT-WF bracket with box and cover preinstalled
The combination of the BBT-WF and BBT-TG bracket is not listed to support a luminaire.

78101102900	**BB8-24**	24″	25

Open box mounting brackets

- Open box support allows for adjustability of box position between studs

- Supports most U.S. and Canadian boxes and/or plaster rings 4" square, $4\frac{11}{16}$" square, 5" square, and multi-gang boxes

- Fits up to $1\frac{1}{2}$" wide studs 16" to 24" on center

- Compatible with adjustable mud rings (see page 26)

- Field cut to adjust to non-standard stud spacings

- Stamped markings at $\frac{1}{4}$", $\frac{1}{2}$", and 1" increments to allow the installer to easily locate the desired box position

- Available factory assembled as part of the Ruff-IN pre-fab line with box(es), mud ring(s), and ground wire(s)

- BB7AP alignment plate centers and secures box to the bracket, allows for easy adjustment of box location

- Finish: pre-galvanized

- Patent pending

Ruff-IN components - brackets and supports

Box support brackets

- Interlocking wrap-around design provides extra rigidity

- Compatible with adjustable plaster rings (see page 26)

- Adjustable for varying stud depths (2½" to 6"); simply bend bracket for 2½", 3½" and 4" depths

- For 5½" depth, snap the BB70E into the next notch on the bracket side

- Integral mounting tabs for attaching plaster rings

- Multiple brackets may be ganged together
- Available factory assembled as part of the Ruff-IN pre-fab line with box, mud ring, and ground wire

- Finish: Pre-galvanized

BB70
Can be used with BBFS18 (floor stand); See page 22

Floor stand box supports

- BBFS-18 floor stand ensures consistent box height and eliminates need to measure for proper install height

- Can be used with BB7 and BB8 brackets

- Finish: pre-galvanized

UPC/part number	Catalog #	Description	Box qty.
79903851597	**BBFS-18**	Floor stand	25

BBFS-18
BBFS-18 Installed (can be used with BB7 or BB8 brackets)

Productivity and part reduction opportunity!

Try the auto height on the BBT-HF instead of floor stands - less parts.
See page 17 for more details.
Ruff-IN components - brackets and supports

Floor mount box supports

- BBF floor stand provides the most rigid support in the industry

- Far-side support accommodates 6", 5½", 3⅝", and 2½" stud depths

- Fold-out tab built-in to attach floor stand to stud if desired

- Integral "wings" provide rigid support when floor stand is mounted between studs

- Optional cable containment clip securely attaches to floor stand without hardware

- Patented Marty Mouse ears enable boxes to be secured with or without the plaster rings

- Finish: pre-galvanized

Ruff-IN components - boxes and covers

Adjustable mud rings

- Adjustable mud ring can be used with 4" square and $4^{11}/_{16}$" square, $2^1/_8$" deep boxes and fits a range of drywall thicknesses

- Mud ring can be adjusted after sheet rock, mud, or tile is installed without removing the wiring devices

- Helps reduce labor and requirements for multiple products of varying wall thicknesses

Ruff-IN components - accessories

Metal protector plates

- Protects box contents from drywall mud, paint and debris

- Protector plates provided with all wiring device assemblies

- Can be installed on plaster rings with or without pre-installed wiring devices

- Helps protect pre-installed wiring devices from damage during drywall installation

- Design transmits force of drywall installation to the plaster ring - not the wiring device

- Domed plate for toggle switches allows for clearance between the plate and switch, and helps eliminate scratching of the devices

- Two protector plates are required for two device plaster rings

Wiring devices

Today's commercial buildings must be energy-efficient, intelligent and provide a safe, productive and inviting environment. Whether it's turning lights ON/OFF when motion is detected or controlling receptacle outlets to minimize energy use, Arrow Hart's specification grade commercial wiring devices are engineered with unique features that can help reduce installation time, provide reliable performance and save energy.

Commercial switches

- Designed to save time and labor, our wide range of commercial grade switches include traditional toggle and decorator styles that are thoroughly tested to ensure reliable electrical and mechanical performance.

Commercial specification grade receptacles

- Commercial grade receptacles are engineered for safe and reliable performance while providing installation efficiency to help finish the job on time.

- Straight blade receptacles are UL 498 and Federal Specification WC-596 listed for maximum durability.

- The dual and half controlled receptacles feature a NEMA approved controlled symbol for easy identification of a controlled circuit, meeting the latest NEC® requirements and CA Title 24 and ASHRAE 90.1 Energy Efficiency standards.

Ruff-IN components - accessories

Concrete box clamp

- Secures electrical boxes in concrete block
- Quickly installs with no tools required
- Works for single or double gang boxes
- Completely re-usable
- Able to be used with flush mount rings or penetrating rings when block wall will be covered

2AR	AMR2 adj ⅝" to 1-½" raised, 2 gang
3AR	AMR3 adj ¾" to 1-½" raised, 3 gang

If no device is required, catalog number is complete after mud ring step.

Catalog number reflects 4" mud rings. For 4-11/16" mud rings, see page 35.

Device style

BLANK	Standard
D	Decora

Device amperage

15	15A
20	20A

Device type

D	Duplex receptacle
U	Duplex receptacle/ USB
SP	Single pole
G	GFCI
3W	Three way switch

Device grade

BLANK	No device
C	Commercial
S	Specification
I	Industrial
H	Hospital

Device color

V	Ivory
W	White
R	Red
LA	Light almond

Tamper resistant

BLANK	Non-tamper resistant
TR	Tamper resistant

Receptacle ground orientation

BLANK	Up
DN	Down

*Duplicate per device.

†Position 2 and 3 are only added for multi-mount or open mount assemblies. Insert a space, replace "X" and repeats steps 3-11 for additional boxes on assembly. If 1st or 2nd positions are blank, then insert "X" and use steps 3-11 in position where box is required.
