### CS-EV2 - MIFARE® DESFire® Clamshell Card

#### **Product Description**

The CSEV2 is a clamshell card containing a MIFARE® DESFire® EV2 (4K) RFID chip. It's the ideal solution for any high-security access control projects, as the AES128 encryption prevents card cloning. CSEV2 integrates seamlessly into our user-friendly KRYPTO high-security system. It is available in packs of 25.

CDVI offers a variety of access control credentials with different technologies (125 kHz proximity or MIFARE®). You'll find the ideal credentials to meet the needs of your installation. You can also customize our CDVI cards and tags with your own company logo (minimum order of 1,000 units).

#### **Key Features**

- Compatible with MIFARE® DESFire® and KRYPTO readers
- MIFARE® DESFire® EV2 4K (13.56 MHz)
- Available in packs of 25

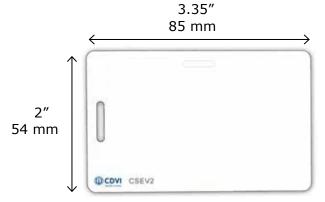

## **Product Specifications**

**Material:** PVC

**Technology:** DESFire® EV2 4K

Frequency: 13.56 MHz
Security level: High security
Weight: 0.2 oz, 8 g

Thickness: 0.07" (1.8 mm)
