ISOEV2 - MIFARE® DESFire® Printable ISO Card

Product Description

The ISOEV2 is a thin, printable PVC card containing a MIFARE® DESFire® EV2 (4K) RFID chip. It's the ideal solution for any high-security access control projects, as the AES128 encryption prevents credential cloning. ISOEV2 integrates seamlessly into our user-friendly KRYPTO high-security system.

CDVI offers a variety of access control credentials with different technologies (125 kHz proximity or MIFARE®). You'll find the ideal credentials to meet the needs of your installation. You can also customize our CDVI cards and tags with your own company logo (minimum order of 1,000 units).

Key Features

- Compatible with MIFARE® DESFire® and KRYPTO readers
- MIFARE® DESFire® EV2 4K (13.56 MHz)
- Pack of 25 cards
- Printable on both sides
- Sequential decimal number on each card
