

## Datasheet

### KTAG25 - Black Key Ring Tag

#### Product Description

The KTAG25 is a black PVC fob with a handy metal keyring. It contains a 125 kHz RFID chip, this affordable RFID proximity solution is ideal for any standard access control projects.

CDVI offers a variety of access control credentials with different technologies (125 kHz proximity or MIFARE®). You'll find the ideal credentials to meet the needs of your installation. You can also customize our CDVI cards and tags with your own company logo (minimum order of 1,000 units).

#### Key Features

- CDVI 26-bit encoding (125 kHz)
- Sequential decimal number printed on each tag
- Available in packs of 25

 Certification

 DEEE

**RoHS** Certification
