

Cementex Arc Flash Task Wear Overview

Contractor Series \$

The Cementex Contractor Series is designed for those looking for a lower cost option without sacrificing quality or safety. By minimizing costly features and still using premium USA labor and materials, Cementex has created the perfect blend for safe Arc Flash Protection at an economical price

Feature Series \$\$

The Cementex Feature Series is designed for those looking for the next level of comfort, safety, durability and protection. With the ultimate focus on safety and usability, we've included all the features you want and none you don't. Made with USA labor and materials insure quality and peace of mind.

UltraLite Series \$\$\$

The Cementex UltraLite Series takes innovative design and the latest and greatest technologies to make the lightest, most comfortable Arc Flash PPE Task Wear available. Utilizing many of the benefits of the "Feature Series", made with USA materials and labor, creates the pinnacle in Arc Flash PPE available today.

CONTRACTOR SERIES

The perfect blend of premium quality safety equipment in an affordable package. This series provides qualified electricians the safety they deserve and the value they require in complying with OSHA, and NFPA 70E guidelines. By minimizing costly features while still using premium Made with USA labor and materials, Cementex has created the perfect blend for the safest Arc Flash Protection at an economical price.

A low cost series that is loaded with features:

- Two-way covered FR Velcro® open front for easy entrance and removal
- FR Velcro® Wrist and Ankle straps for easy donning, removal, and adjustment while wearing boots
- FR Elastic Waste for comfort fit
- 32" Standard inseam
- Meets current ASTM F1506 standards
- Meets current ASTM F1959/F1959M-99

ULTRALITE SERIES

The Cementex UltraLite Series takes innovative design and the latest and greatest technologies to make the lightest, most comfortable Arc Flash PPE Task Wear available. The gray color allows for easy recognition of contaminated areas and has significantly cooler feel in the outdoor sun (also available in navy). With many of the usefull benefits of the "Feature Series"; Cementex UltraLite Task Wear is proudly Made with USA labor and materials to insure quality, and peace of mind.

An industry leading, light weight series loaded with features:

- Meets current ASTM F1506 standards
- Meets current ASTM F1959/F1959M-99

11 and 12 cal/cm² Task Wear

Innovation and the lightest most comfortable Arc Flash PPE Category 2 Task Wear available. Designs created after years of first-hand market research.

Balaclava Hooded Long Sleeve T-Shirt

- Long Sleeve T-Shirt portion of the garment is an airy, comfortable blend that is oversized to fit comfortably over the top of daily wear.
- Attached balaclava hood is designed to be comfortable when worn "up" for Category 2, or "down" for Category 1.
- By combining these task wear garments into one unit you can assure your balaclava is always WITH your PPE Kit.
- Indura Ultra-Soft® Knit Material
- Nomex® knit wrist cuffs

Pant:

- Simplicity with attention to detail
- Indura Ultra-Soft® material
- FR hook and loop ankle adjustment
- High elastic waist for comfort and ample overlap with shirt and/or coat
- 2 "Slash Pockets" for access to daily wear

BATTERY ACID RESISTANT

Cementex Battery Acid Resistant Fabric offers a new feel to the electrical safety market. The uniquely woven blend of fabrics offer great breathability and optimized moisture management to keep the wearer cooler, drier, and more comfortable overall. The fabric strength keeps the fabric piling to a minimum. The battery acid resistance is described as "breakdown" of the fabric versus standard flame resistant treated fabrics. The fabric has been tested for arc rated compliance.

A premium series that is loaded with features:

- FR Velcro® front closures (where applicable) for a secure closure, easy access, and rapid removal in the event of arc exposure
- FR Velcro® calf/ankle closure for easy access and fit adjustment donning, removal, and adjustment while wearing boots
- Coverall includes elastic back for ease of movement
- Nomex® knit wrist cuffs on all coats and coveralls
- Bib/Pants have easily adjustable "quick disconnect" shoulder straps.
- Anti-Fog Faceshields
- Available in sizes S-5X with a standard inseam of 32"
- Meets current ASTM F1506 standards
- Meets current ASTM F1959/F1959M-99

26/40 cal/cm² Task Wear

These Task Wear garments can be worn independently to achieve Arc Flash PPE Category 3.

To achieve Arc Flash PPE Category 4 these garments MUST be used in conjunction with Cementex's 8 cal/cm² battery acid resistant Task Wear. The combination of layering these two garments together has tested to an ATPV of 48.3 cal/cm²; well beyond the 40 cal/cm² minimum needed to achieve Arc Flash PPE Category 4.

As per NFPA 70E; layering to achieve higher protection may only be done when garments have been tested together as they would be worn. DO NOT layer Arc Flash PPE garments for increased protection if they have not been tested together.

Test data available upon request.
