ED.03

### Contactors and overload relays

GE imagination at work

## GE – Global

GE is “Imagination at Work” – a diversified technology, media and financial services company focused on solving some of the world’s toughest problems. “Imagination at Work”, is a spirit that is driven by relentless passion and commitment. It is cognizant to needs, and has the power to transform ideas into innovative technological breakthroughs. It is a spirit that strives to serve people in a manner that reflects our values. With products and services ranging from aircraft engines, power generation, industrial solutions, water processing and security technology to medical imaging, business and consumer financing, media content and advanced materials. GE serves customers in more than 100 countries and employs more than 300,000 people worldwide.

Innovation has always been the foundation of our past and the key to our future contributions. GE plays a vital role in our modern world by making extraordinary ideas, a natural part of everybody’s life. We are committed to anticipate and meet changing needs and represent imagination in a manner that reflects our principles. We take pride in delivering quality and value to our customers day after day.

## GE Energy – Industrial Solutions, India

GE Energy – Industrial Solutions, India offers innovative solutions to meet customer needs in Power & Protection. The company has a pan India presence, with 4 regional offices, 13 sales offices and manufacturing plant at Bangalore.

GE Energy – Industrial Solutions, offers solutions and products to customers in several segments that include power sector, core infrastructure like marine establishments, airports, highways, heavy and light Industries, IT & ITES infrastructure, healthcare, commercial and residential segments.

## The India Innovation Center

The India Innovation Center (IIC) is a dedicated engineering research & design IT development center for the global GE Energy – Industrial Solutions business. Established in 1999, IIC today is amongst the largest design and development centers for GE Energy – Industrial Solutions business. IIC employs more than 1000 engineers and IT professionals working with teams across the globe.

## About the Technology Team

The Technology teams at IIC develop new products and solutions for the global market in the areas of Circuit Breakers, Motors, Power Quality and Protection, Electrical Machines, Industrial Automation, Sensing Systems.

## Contactors

### Standards

IEC/EN 60947-1	BS 4794
IEC/EN 60947-4-1	NFC 63-110
IEC/EN 60947-5-1	CSA C22.2/14
EN 50003	VDE 0660
EN 50005	SEV 10254
EN 50012	JIS C8325
UL 508	JEM 1038
NEMA ICS-1	CENELEC HD 419

### Approvals

CE

Order codes	pg. C.3
Auxiliary contact blocks	pg. C.6
Accessories	pg. C.8
Dimensions	pg. C.22

### Three and four pole minicontactors 6, 9 and 12A (AC3) 20A (AC1)

- Control circuit: Alternating current up to 600V  
Direct current up to 440V
- Terminal numbering in accordance with EN 50012
- Fixing by clipping onto 35 mm DIN rail (EN 50022-35) or by screws
- Screws and fast-on terminals protected against accidental contact in accordance with VDE 0106 T.100 and VBG4
- Versions: Ring terminal and printed circuit terminals
- Facility to mount instant and timed auxiliary contact blocks and voltage suppressor block
- Degree of protection IP20 (EN 60529).
- Maximum number of auxiliary contacts to be added: 6

### General data

	MC0...	MC1...	MC2...
<b>Maximum number of poles</b>	4	4	4
<b>Rated thermal current (I<sub>th</sub>) θ H 60°<sup>(1)</sup></b>	(A) 20	20	20
<b>Rated operational current I<sub>e</sub><sup>(2)</sup></b> (3x440V, 50/60Hz, AC3)	(A) 6	9	12
<b>Rated insulation current U<sub>i</sub></b>	(V) 750	750	750
<b>Rated operational current U<sub>e</sub></b>	(V) 690	690	690

### Standard voltages

To complete the catalogue number, replace the symbol ♦ by the code corresponding to the voltage and frequency of the control circuit (other voltages on request)\*

#### Alternating current (V). Bifrequency coil

♦	10	1	2	9	3	4	5	6	7	8	12	13
AC	12	24	42	48	110	120	220	230	240	440	380	400
50/60Hz											115	

#### Operating voltages limits with bifrequency coils:

With 60Hz = 0.85 to 1.1 x Us

With 50Hz = 0.8 to 1.1 x Us in continuous service (ED=100%) with a maximum ambient temperature of 40°C

#### Alternating current (V).

♦	A	E	G	K	M	N	S	U	W	Y
AC			48	115		220	260	380	415	500
50Hz				127		240		400	440	
AC	6	32	60		208	240		440	480	600
60Hz					220	277				

#### Direct current (V)

♦	A	B	C	D	E	F	G	H	I	J	K	L	N	17	R	S	16
DC	6	12	32	24	36	42	48	60	72	110	120	125	220	230	240	250	440

#### Direct current (V) - Wide voltage range

♦	WD	WE	WG	WI	WJ	WN
DC	24	33	48	72	110	220

\* Please Consult GE for non standard Coil Voltages

## Multipack. Series M and Series CL

To reduce the amount of waste packaging material and to save time during installation, we offer the opportunity to order contactors in a multipack without the individual packaging.

Product	Type	Standard pack	Multipack (1)
Minicontactors	MC0A...MC2A	20	40
Contactors	CL00A..CL25A...	20	40
	CL03..CL45..	10	20

(1) The quantity ordered must be a multiple of the quantity in each multipack  
(with the same frame/size and coil voltage)

### How to order

To order a multipack, add the suffix **MP** to the standard catalogue number

Example	Standard pack	Multipack
	MC0A310ATN	MC0A310ATN <b>MP</b> (40 pieces)
	CL03A400MJ	CL03A400MJ <b>MP</b> (20 pieces)

## Three and four pole contactors 9 to 105A (AC3) 25 to 140A (AC1)

- Control circuit: Alternating current up to 690V  
Direct current up to 440V
- Terminal numbering in accordance with EN 50005 and EN 50012
- Fixing by clipping onto 35mm DIN rail EN 50022-35 or by screws
- Screws protected against accidental contact in accordance with VDE 0106 T.100, VBG4
- Ring terminal version
- Three coil terminals
- Mounting possibilities of front/side instantaneous auxiliary contact blocks, timed auxiliary contact blocks, mechanical latch, transient suppressor block and interface modules
- Degree of protection: IP20 to CL00 ... CL02  
IP10 to CL25 ... CL10
- Maximum number of auxiliary contacts: 4 for CL00 ... CL25  
6 for CL04 ... CL45  
8 for CL06 ... CL10

## Standard voltages

To complete the catalogue number, replace the symbol ♦ by the code corresponding to the voltage and frequency of the control circuit.  
(other voltages on request)\*

### Alternating current (V). Dual-frequency coil

♦	1	2	9	3	4	5	6	7	13	8	15
AC	24	42	48	110	120	220	230	240	400	440	480
50/60Hz				115							

### Alternating current (V).

♦	E	K	L	N	T	U	W	Y	Z
AC	32	127		220		380	415	500	660
50Hz				230		400			690
AC				208	277	380	480	460	600
60Hz									

### Direct current (V)

For contactors type CL...D / Operating limits: 0.80 ... 1.10 x Us

♦	B	D	E	F	G	H	I	J	K	N	P	R	T	X
Voltage	12	24	36	42	48	60	72	110	120	220	230	240	250	440
													125	

Coil with electronic module for contactors CL...E (can also be used with alternating current)

♦	D	F	H	J	N	Y
Voltage	24	42	60	110	220	440
	28	48	72	125	250	

### Direct current (V). Coil with wide voltage range (0.70 ... 1.30 x Us)

For contactors type CL...D

♦	WB	WD	WE	WF	WG	WH	WI	WJ	WK	WN	WP	WR	WT	WX
DC	12	24	33	42	48	60	72	110	125	220	230	240	250	440

Maximum number of add-on auxiliary contact blocks:

CL00D..CL02D : 2NO or 1NC  
CL03D..CL45D : 1NO and 1NC  
CL05D..CL10D : 4NO or 2NC  
CL05E..CL10E : 4 cont. aux.

### Coil with electronic module for contactors CL...E

♦	WD	WE	WF	WH	WJ	WN
Voltage	24	33	48	72	110	220

Different auxiliary contact configurations, contact us.

\* Please Consult GE for non standard Coil Voltages

## Contactors

### Standards

IEC/EN 60947-1	CSA 22.2/14
IEC/EN 60947-4-1	CENELEC HD 419
IEC/EN 60947-5-1	NFC 63-110
EN 50005	ASE 1025
UL 508	UNE 20109
NEMA ICS 1	VDE 0660/102
BS 5424 & 775	

### Approvals

Order codes	pg. C.19
Auxiliary contact blocks	pg. C.20
Accessories & Spares	pg. C.21
Dimensions	pg. C.30

### Three and four pole contactors 150 to 825A (AC3) 200 to 1250A (AC1)

- Control circuit: Alternating current up to 690V  
Direct current up to 500V
- Degree of protection IP00 (IPxxB with accessories)
- CK07...CK13: auxiliary and coil terminals originally protected against accidental contacts  
Protection for power contacts on request (see accessories)
- Terminals protected against accidental contacts according to VDE 0106 T.100, VBG4
- CK\_E with electronic module suitable for DC and AC. (50/60Hz)
- CK contactors always provided with one auxiliary contact block BCLL11 (1NO+1NC)

### Standard voltages

To complete the catalogue number, replace the symbol ♦ by the code corresponding to the voltage and frequency of the control circuit.  
(other voltages on request)\*

#### Alternating current (V)

Three-pole contactors:	CK75CA3..., CK08CA3..., CK85BA3...
Four-pole contactors:	CK07BA4..., CK08BA4...

## *Thermal overload relays for minicontactors from 0.11 to 14A*

- Control circuit up to 690V
- Power circuit up to 690V
- Three-pole differential (phase unbalance protection)
- Automatic ambient temperature compensation between -25°C and + 60°C
- Choice of manual or automatic reset
- Direct connection to contactor or independent mounting using accessories.
- Screw and Ring terminal versions
- Terminals protected against accidental contact in accordance with VDE 0106 T.100 and VBG4.
- Terminal numbering in accordance with EN 50005
- Degree of protection IP20 (EN 60529)
- Additional auxiliary contact block 1NO (with manual reset only)

### Standards

IEC/EN 60947-4-1	CSA 22.2/14
IEC/EN 60947-5-1	NI C 63-650
UNE 115	VDE 0660
NFC 63-650	UL 508

### General characteristics

- Thermal protection against balanced overload.
- Three-pole differential (phase unbalance protection).
- Automatic ambient temperature compensation.
- Front mounted selector for choosing utilisation current.
- Reset button, 2 positions : Manual(H) and Automatic(A) by turning the blue selector.
- Stop push button, independent of reset (red).
- Manual trip lever (tripping test).
- Tripping indicator (0-1).
- To facilitate wiring arrangements terminal 96 fits directly onto coil terminal (A2) and terminal 14/22 fits directly onto the feedback auxiliary contact.

## Approvals

## Thermal overload relays for contactors from 0.16 to 850A

- Control circuit up to 690V AC
- Power circuit:
  - RT1, RT12: up to 690V
  - RT2, RT22, RT3, RT32, RT4/4L, RT5/5L & RT6/6L: up to 1000V
- Thermal protection against normal overloads.
- Three pole differential (phase unbalance protection).
- Protection against long starting times.
- Automatic ambient temperature compensation between - 25°C y + 60°C.
- Front mounted test button.
- Trip indication.
- Independent auxiliary contacts with double rupture (1NO + 1NC).
- Function selector:
  - Manual RESET
  - Manual RESET and STOP
  - Automatic RESET with STOP
  - Automatic RESET without STOP

(1) Most suitable fuse in accordance with IEC 60947-4-1.

(2) Fitting direct to the contactor.

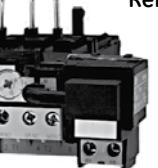

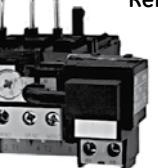

(3) Fitting direct to the contactor: by means of a coupling and connection set.

Separate mounting with screws on DIN rail / with cable connection.

(4) RT6A = RT1 with right setting range plus RTXP, independent mounting base adaptor, to be utilised with current transformer connected by passing cable chosen by customer. Current transformer data on request.

## Electronic overload relay

### Approvals

### Product features

Lower power consumption

➤ Saving space into cabinet

Great accuracy

➤ Better motor protection

Full reliability

➤ Low risk to burn motor

Phase unbalance protection

➤ Better motor protection and current control

Direct fitting to contactors Series CL

➤ Compact starter

Interchangeable with thermal overload relay

➤ No need to redesign existing cabinet

Multiple trip class selection

➤ One device cover for start time motor

Manual / Auto reset

➤ One device for two solutions

### Main characteristics

- Setting range from 0.1 up to 150A
- Self powered
- Thermal memory
- Phase loss protection
- Phase unbalance protection
- Direct fitting to contactors Series CL
- Interchangeable with thermal overload relay
- Multiple trip class selection
- Manual / Auto reset
- Increased flexibility, less order codes, less stock
- Tripp class: 5 - 10 - 20 - 30

## Approvals

## Contactors for capacitors switching

*With built-in resistance to switch three phase capacitor banks*

"CSCN" contactors incorporate a front block with three early-make auxiliary contacts together with 6 quick discharge resistors (two per phase) through which the capacitors are switched to the network, reducing the current peak. Once the resistors have damped the current peak, the main contacts short-circuit the resistors, carrying the uninterrupted current.

A few milliseconds later the early-make auxiliary contact closes to guarantee that all current flows through the main contacts.

## Standard voltages

To complete the catalogue number, replace the symbol ♦ by the code corresponding to the voltage and frequency of the control circuit.  
(other voltages on request)\*

	A	B	C	D	E	F	G	H	M	R

## Clapper contactors 40A to 800A (AC-3) / 45A to 1200A (AC-1)

AC and DC control using a bridge rectifier, designed to meet the most recent stringent requirements in terms of reliability, service life and performance.

## Main characteristics

- Sliding contact holder, set on self-centering and self-lubricating bronze bushings
- Minitubes made of high-strength, high electrical resistance material
- Individual auxiliary contacts

## Construction

Variable composition contactors (the number of main poles and auxiliary contacts may vary), preferably secured on mounts

## Control circuit

Solid iron magnetic circuit with coil powered by direct or rectified current, particularly for heavy-duty applications (e.g., cranes, roll mills, reversing winches, etc.).

The coils are sized for intermittent operation. For continuous operation, insert an economy resistor in series with the coil using the respective auxiliary contact.

## Main contacts

The sintered main contacts are classified as Type 4/2 for intermittent operation and Type 5/2 for continuous operation.

The 4/2 sintered contact may be used only for heavy-duty operation when the number of switching operations per hour is above 60 and the operating intermittence is equal to or less than 60% (cranes, roll mills, etc.).

If used for continuous operation, the contact will overheat.

The 5/2 sintered contact may be used only for normal duty when the number of switching operations per hour is equal to or less than 60% and the operating intermittence is above 60%.

## Auxiliary contacts

Individual NO or NC single-break contacts

Possibility to advance or delay contact making or breaking

## Special versions

The following items may be supplied upon request:

- Contactors with coils having an operating limit that exceeds the limits required by the standards
- Contactors with an operating voltage up to 3000V (rotary disconnect switches, induction furnaces, etc.)
- Vertical mechanical interlocks ideal for interlocking 3 contactors.

## Spare parts and additional components

Order codes	pg. C.53
Coils	pg. C.56
Spare parts	pg. C.57
Dimensional drawings	pg. C.60

Spare parts and additional components for the contactors are listed on page C.91.

## Control voltage and normal combinations

Normal rated voltages, shaft spacing and combinations (main and auxiliary poles) have been defined for each switchgear unit, thereby allowing the contactor to be rapidly selected.

AC rated voltages: 24V - 48V - 110V - 220/230V

DC rated voltages: 24V - 48V - 110V - 220/230V

Spacing between standardised shafts and combinations:

See pages C.96 to C.98

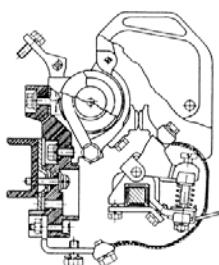

Standard center-to-center spacing (mm): 150, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800, 900, 1000

## Main poles

The poles can be constructed as follows, depending on the operating conditions:

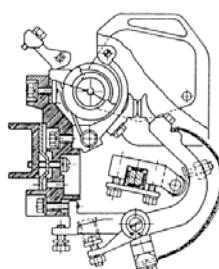

### Z design (NO)

- For load breaking, with high breaking capacity
- For AC or DC use
- Equipped with magnetic arc-quenching coil. In the case of AC, the poles are normally supplied with an appropriate arc-quenching coil for the maximum rated current of the pole.
- Arc-quenching coils for medium rated currents with respect to the expected peak current are available for DC use upon request, for more effective pole performance (see table on page C.90).

### RN design (NC)

- Based on the use of break poles, which are open when the coil is energized and closed when the coil is de-energised.
- For AC or DC use in special circuits where high interrupting capacities are not required.
- This design is intended to be used with contactors R1, R2, R3, R4, R5, R7.

Poles	R1	R2	R3	R4	R5	R6	R7	R8	R9
Z	■	■	■	■	■	■	■	■	■
RN	■	■	■	■	■	■	■	■	■

## Standardised DC or rectified coils

The DC coils are suitable for intermittent operation; for continuous operation, an economy resistor must be used.

The coils for rectified rated voltages 20-40-97-197V obtained from AC power supplies. (before the rectifier). 24-48-110-220V are available upon request. For the contactor of "RN" break poles, contact GE.

(1) To insert the resistors, use NC auxiliary contacts in series.

(2) Two 20x165 resistors connected in parallel, each with a resistive value listed in the table.

*Spare parts*

Contactor	Description	Cat. no.	Ref. no.	Pack (units)
R1	"Z" stationary part with 14A arc-quenching coil and spark suppressor	390/3921PFZCS14	202273	1
	"Z" stationary part with 25A arc-quenching coil and spark suppressor	390/3921PFZCS25	244172	1
