

CANNON 6K™

TWO WIRE PULLERS IN ONE

iTOOLco.

The Cannon 6K™ is two wire pullers in one with dual capstans that can pull 8' and 28' per minute on low speed and 20' and 70' feet per minute on high speed. This versatile wire puller is lightweight and easy to transport, making it the puller of choice for many electrical contractors and electricians.

WE OWN TWO OF THE ITOOLCO CANNON 6K™ WIRE PULLERS.

We just pulled 350' of 4 conductors 250 MCM in about five minutes. Best tugger I've ever used.
