KNIPEX

KNIPEX Pliers.
German craftsmanship
from design to production.

KNIPEX – the company behind the pliers.

For over 130 years and four generations, we have been working passionately on being the best manufacturer of pliers for our customers and users – with a clear focus, high demands and a constant flow of new ideas. Throughout the world, our brand enjoys a great deal of trust, and we aim to consistently meet and rebuild this.

Success is important to us, but is not something we look for at any price. We are guided by values, orientate our actions towards sustainability, and face up to our responsibility towards society and the natural environment in which and with which we live. We invest heavily in the efficiency of our location and the qualification of our employees, working today on the success of tomorrow and the day after that – so that we can also continue to be a strong and reliable partner in the future.

Yours, *Ralf Putsch*

Ralf Putsch, Managing Partner.

CoBolt® XL

Electrical Installation Pliers

X-Cut®

Pliers Wrench

TwinForce®

Bolt End Cutting Nippers

Spring Hose Clamp Pliers

KNIPEX pliers are different: ideas for improved use and performance.

Ever better pliers – that is our guiding principle to which we devote all of our expertise and creativity. We are not satisfied with standard solutions, but rather continuously develop new and improved models that are better to work with and easier to use.

Working this way means that sometimes we find unconventional solutions to situations, which then go on to set new benchmarks in the industry: novel methods of power transmission, easier and faster handling, combining various functions in a single tool and imaginative problem solvers for special applications. These new benchmarks save our users energy and time, giving them better work results with less effort.

In addition to major innovations, we work continuously on reworking our current product models to improve their function, ergonomics and service life.

1 Compact force: CoBolt® XL – two-hand operation for maximum cutting force.

2 Easy operation: Cobra® – fast grip, precise adjustment, push-button, self-locking.

3 Multifunctional: Electrical Installation Pliers – six functions in one pair of pliers.

4 Universal cutting force: X-Cut® – the first high leverage diagonal cutter with box joint and precision cutting edges.

5 Speed and versatility: Pliers Wrench – turns, holds, bends and presses without damaging materials.

6 High performance cutting edges: TwinForce® – high strength due to unique transmission.

7 Redefined end cutting nippers: Bolt End Cutting Nippers – light, slim, cut directly on the pivot point.

8 Problem-solver: Spring Hose Clamp Pliers – the only pliers for all spring clamps; apply safely from all angles.

Step by step: from idea to product.

A large number of steps lie between an initial idea and the finished product. We never lose sight of the fact that every new or redevelopment must represent a noticeable improvement for the user. We deploy the most up to date technologies and processes when putting our ideas into practice.

We begin by carefully establishing the requirements and selecting the best concepts. The tool is constructed on a computer and the function is simulated with the help of special software. This is followed by the first models made on a 3D printer and by milling and extensive tests on steel prototypes – working closely with experienced users. The first products manufactured using production processes are subjected to additional extensive tests – under conditions far more stringent than normal load.

The locking mechanism on the Spring Hose Clamp Pliers permits simple and safe work, even with closed clamps. Modern CAD technology simulates the mechanism on the screen.

Filip Marovic, project manager for KNIPEX Product Development – "It can be seen repeatedly during the development cycles how important even the smallest detail can be. This is the very thing that motivates me to find creative new solutions. During the process we also take new technical possibilities in processing technology and materials into consideration."

Core qualities: steel – and what we make from it.

You can expect a great deal more from a pair of KNIPEX pliers. This starts with the material. The many models of pliers in our range are designed for different requirements and loads. We use steel alloys that have been specially selected for the application and rolled according to our high specifications. Long lasting cutting capability when working with very hard wires, strength when working with high torque loads, and good resistance to corrosion are examples of these targets.

The respective materials are then given their specific molecular structure in a number of coordinated heat treatment steps to produce the optimal relationship between hardness and toughness. These processes allow us to achieve the high degree of reliability, durability, and service life that are the very definition of KNIPEX pliers.

Macro image of a cutter after induction hardening. The specially hardened cutting area (light) is in sharp contrast to the softer structure of the body of the pliers (dark).

Alligator® Water Pump Pliers
being forged by a hydraulic
driven drop-forging hammer.

This is how our pliers are given their shape: hot and under high pressure.

Forging as a forming process is an old cultural technique and continues to hold fascination today. With an impact of up to five and a half tons, the yellow glowing piece of steel is pounded in the upper and lower die at a temperature of 2,282°F. This gives it its basic shape and simultaneously a well-compacted structure.

The production of the forging die in our tool making requires a great deal of experience and high precision, as this raw component will be crucial to the subsequent quality of the pliers. The contours of the forged component are milled at processing centers in the hardened and high strength die block.

Forging die for the high leverage diagonal cutters with forged-in axle.

The technology behind the pliers: machines made by KNIPEX.

Tools can only be as good as the production technology used to manufacture them. In other words, there cannot be superior products without advances in production processes.

Due to our specialization, we can focus on the technologies needed to produce high quality pliers efficiently. We have more than 400 machines built with the specialized knowledge of generations. We build many of the machines ourselves or adapt machines precisely to our high standards using components we have manufactured. We even program the software for the control and operation of the machinery ourselves.

From the product idea to the dispatch of the finished pliers to our customers: everything is done under one roof. This way we can directly influence all steps of value creation ourselves in terms of quality and efficiency, and make continuous improvements. Short distances and direct contact simplify the coordination of processes and communication between employees.

We ensure our high standards by developing our own processes and machinery.

Efficiently coordinated processes and machinery.

Over 45,000 pairs of different models of pliers leave our factory every day.

Only after several test cuts, does a pair of KNIPEX cutting pliers leave our factory.

We take it very literally: 100% reliability.

The precision of pliers is essential for their function: without accuracy there can be no reliable cutting, gripping, bending and zero backlash. The tight tolerances, which we make sure are complied with through the use of modern production technology, enable us to meet our stringent quality specifications.

We ensure compliance through strict measurements and diverse inspections – after the various production steps and at the end of the entire process. To do this we use the most up-to-date measurement technology and endurance tests – as well as the practical component test by hand.

Shape and roughness of the diagonal cutter's cutting edge are precisely measured with an optical 3D measuring system.

More than excellent pliers: what else you can expect from us.

Quality does not stop with the product. Trust, reliability and a collaborative approach define our business relationships – with consistent customer focus, good service and competent field staff. We provide advice and training, and supply you with extensive digital product data adapted to your specific requirements. Added to this are diverse possibilities for sales support.

You will not find the breadth and depth of our range with any other manufacturer worldwide – that's how we ensure that your customers can always find the tool they are looking for.

We present the breadth and depth of our range at in-house exhibitions and open house days.

At home in the world: locations in more than 100 countries for you.

KNIPEX is the global pliers brand. We are present in all continents, with a dense network of customers, representatives, and branches. In order to be closer to our retailers and be able to give them even better support, we are further extending our international activities all the time.

There is no substitute for direct contact, which is why we are there for you personally at more than 100 trade shows each year. With the help of the most varied media – classic and digital – we provide comprehensive information about our range and application opportunities in over 30 languages. We reach users and fans throughout the world via social media and hundreds of KNIPEX online videos.

We make up-to-date information available digitally in several languages.

The key factor: our employees.

The most important basis of our success is our employees. Their knowledge and skills, their dedication and their ideas are crucial to our efficiency and thus to our future.

As a company, we are a social community. We want to shape our culture in such a way that allows our employees to participate and create identity through their work but also as individuals. We create good conditions for our employees to develop their potential, to obtain further qualifications and to stay healthy. It is also important to us that our employees are able to successfully balance family and career.

We invest a significant amount of both expense and care in the training of young people, but also impart a wide spectrum of professional and personal skills to other employees.

Our junior staff obtain their qualifications in our own modern training workshop.

Acting responsibly – sustainable management.

As a company, we believe we share responsibility for our natural environment and the well-being of society. We interact with both in various ways. We consume resources, but take care to use them as carefully as possible, and want to make a contribution to ensuring that they are available to future generations in the same – or wherever possible – a better form.

Our ecological objectives include a continuous reduction in our energy consumption, reduction in the volumes of waste and caring for the biodiversity at our site. In addition, we participate in major climate protection projects.

Companies should also be good citizens. We support numerous institutions and organizations in the areas of education and culture. We maintain a close exchange with schools and universities, and strengthen civic engagement in our region in diverse ways.

We support the Bergische music school in the "Singpause" project which, with the help of specially trained teachers, communicates the foundations of music and pleasure by singing together in schools.

High Leverage Combination Pliers

DIN ISO 5746

02

35% less effort required than with conventional combination pliers
Cutting edge hardness (approx. 63 HRC) for heavy-duty cutting

- > easier work due to high leverage design
- > easier cutting, powerful gripping, bending and pulling
- > long cutting edges for thicker cables
- > gripping zones for flat and round material for a variety of uses
- > high-grade special tool steel; forged, multi stage oil-hardened

**Small high leverage combination pliers with pointed jaws
For all common installation and repair work**

Handy for use when working in confined areas due to slim head design and pointed jaws (anti-twist)

Gripping surfaces with special convex contour on one side for secure gripping of flat parts

Milled groove in the gripping area permits small parts such as nails, pins and bolts to be held and pulled

- > easy cutting due to the high leverage joint
- > cutting edges for soft, medium hard and hard wire
- > long service life and stable tips
- > high-grade special tool steel; forged, multi stage oil-hardened

Precision Insulation Strippers

with replaceable blades

12

12

- > form-fit stripping of both standard and difficult-to-remove insulating materials made of PTFE, silicone, Radox®, Kapton® and rubber including multi-layer insulations
- > a second pair of blades holds the remaining insulation reliably in place
- > replaceable shaped blade adapted precisely to the respective conductor diameter
- > includes length stop for consistent stripping length during repetitive work
- > pliers body: steel
- > blade: special tool steel; oil-hardened

12 12 02 is the only Precision Installation Strippers that has the cable guide

Precise, complete clean cut of the insulation

Quality stripping due to precise shape of the blades

Maximum cable cross-section (in mm²) per profile:

Principle of operation with shaped blades

Proper and precise stripping with an annular cut through the complete insulation. This is particularly important with conductors, which must be stripped precisely.

This works without any problem even with difficult insulating materials made of PTFE, Radox® and multi-layer insulations.

Precise and Reliable

Two pairs of blades (1) completely cut the insulation.

Then the blade pairs move apart, and the insulation is removed (2). The pliers opens automatically after the stripping procedure.

12 59 02	1 pair of spare clamping jaws for 12 50 200

Stripping without readjustment from 32–8 AWG

Universal blade geometry – tough and robust

Ideal grip design with excellent control

Recessed wire cutter

- > automatic adjustment to all single-, multi and fine-stranded conductors with standard PVC insulation. Range of 32 AWG (0.03 mm²) to 8 AWG (10.0 mm²)
- > no manual fine adjustment necessary
- > no damage to the conductors
- > steel clamping jaws with integrated cutting edges hold the cable and prevent slipping
- > includes recessed wire cutter for Cu and Al conductors, stranded up to 8 AWG and single wire up to 10 AWG
- > particularly smooth running mechanics and very low weight
- > replaceable blades block and length stop
- > handle with soft-plastic zone for a steady grip
- > the body is constructed of lightweight fiberglass-reinforced plastic
- > blade: special tool steel, oil-hardened
- > **NOT FOR THHN CABLE**

Wire cutter for multi-stranded wire cables up to 8 AWG (10 mm²)

Steel clamping Jaws avoid slipping of the cable

Precise stripping from 32–8 AWG without readjustment

12 42 195
MM

MultiStrip

Patented Mechanics

The incision depth of the stripping blade adjusts automatically to the diameter of the wire and to the thickness of all standard insulating materials.

There is no need for any of the manual adjustment still necessary when other conventional pliers with a wide wire-stripping range are used.

Mode of operation of straight cutters

An incision is made in the red area only.

Not suitable for highly-flexible or armored insulation materials or multi-layered insulation such as THHN.

Product Number	Packaging	inch mm		Stripping capacities mm ²	AWG	lbs kg

Dismantling Pliers

DIN ISO 5746

13

Multifunctional – dismantling, stripping and cutting with one pair of pliers.

For time-saving dismantling and stripping of all common round and damp-proof installation cables (e.g. NYM cable)

Simplified access especially to deeply mounted flush sockets due to slim head design and optimally angled cable sheath cutter

Strip cables easily and without damage thanks to circular cutting edge with depth limit

- > dismantles outer sheath of cable easily and without damage due to the circular cutting edge with depth limit.
- > precision wire stripping holes for 1.5 and 2.5 mm² conductors
- > integrated diagonal cutters for cutting and trimming conductors, wires, small screws and nails
- > cutting blades induction hardened to (approx. 61 HRC)
- > 30% lighter in weight than comparable pliers
- > slim head design allows for easy access into deeply mounted sockets

Circular cutting edge with depth limit: for easy dismantling without damaging the conductor insulation

Wire stripping holes for 1.5 and 2.5 mm² conductors

Cutting cable up to Ø 13 mm

Cutting when shortening single conductors

Insulation strippers with Cable Shears – two essential electrical installation tools in one pair of pliers

- › integrated cable shears for clean cutting of copper and aluminum cables without crushing
- › universal adjustment of the wire stripping blades with knurled screw
- › slim design allows for easy access into confined areas
- › for stripping single, multiple and fine stranded conductors with plastic and rubber insulation up to a max. Ø 5 mm or 10 mm² conductor cross-section
- › Graduated jaw is a visual guide when stripping wire in standard lengths 7/16" (11 mm) and 5/8" (16 mm)

Induction hardened shear blade with precisely ground cutting edges for crushing-free cutting of copper cables up to 9/16" (15 mm Ø) (5 x 2.5 mm²)

Lock nut prevents any unintentional adjustment

Visual length markings (steps) provide support during repeated stripping of wire in standard lengths 7/16" (11 mm) and 5/8" (16 mm)

Long Reach Needle Nose Pliers

with transverse wave

DIN ISO 9745

28

Long assembly pliers with wave profile

Long slim design is perfect for gripping and assembly work in hard to reach areas

Deep parts can be easily reached using the slim, half-round tips

Grips up to 2 1/4"

- > careful yet reliable gripping, holding and guiding of small copper pipes, screws and cables as well as other round parts due to milled grooves with smooth surfaces
- > four small pulling grooves in jaws will grab tightly when holding and pulling round objects
- > serrated gripping area for holding on to round parts near base of jaws
- > particularly suitable for work in the automotive trade and in mechanical engineering
- > slim yet robust tool
- > forged from special tool steel; oil-hardened and tempered

Transverse wave shape gripping profile for gripping, holding and guiding

The Subtle Difference

KNIPEX precision electronics pliers are made of high-quality ball bearing steel and processed with the highest degree of care. Each opening movement is gentle and even without backlash. Each work step proceeds reliably and precisely. This makes work much easier for professionals.

Which Electronics Pliers is right for you?

KNIPEX has a full line of gripping and cutting electronics pliers. They are available in a variety of jaw types, joint and head styles, bevel types and can have additional features to make working with our products simple and easy.

The gripping line is available in multiple jaw types and gripping surfaces, giving you options for choosing the pliers suited for your work. The cutting line is more expansive and has multiple products lines and pliers available to find the one best fit for you.

Joint Type	Head Type
Box joint, bolted and rivet	Oval, tapered and end cutting
Box joint	Oval head
Bolted joint	Tapered head
Rivet joint	End cutting head

Joint Type

There are three joint types available: Box joint, Bolted joint and Rivet joint.

- > Box joint is used in some of our most popular product lines including our water pump pliers and is proven for precision and durability with its high torsion resistance.

- > Bolted joint provides the most precision and a permanently even cutting movement making it a perfect fit for repetitive type applications.

- > Rivet joint offers the most economical pick of the joint types.

Head Type

There are three head styles available in our cutting pliers: Oval, Tapered and End Cutting.

- > Oval style is the most durable due to the additional material close to the cutting edges.

- > Tapered has a narrowed head which allows for easier access into tight places.

- > End Cutting head style is best for hard-to-reach areas and for working on components from above.

Bevel/Cutting Edge Type Semi-flush, flush and super (ultra) flush			
	with bevel (outside bevel)		semi-flush
	with small bevel (outside bevel)		semi-flush
	with very small bevel (outside bevel)		semi-flush
	without bevel (outside bevel)		flush
	flush cut:		ultra or super flush

Bevel Type

A bevel is a sloping surface on the outer side of the cutting edge.

- > A small bevel leads to an easier and more flush cut while the risk of damaging the cutting edges rises (overloading).

- > A larger bevel allows hard materials to be cut without the risk of damage to the cutting edges.

- > Depending on the size of the bevel, you will get either a semi-flush, flush or ultra-flush cut finish. The choice of bevel depends on the material being cut and the desired flush cut end result. A flush cutting edge is only suitable for soft materials such as copper or plastics.

Handle Type

Our four handle styles are plastic dipped, single-component, multi-component and ESD.

- > ESD stands for Electrostatic Discharge. The handles themselves discharge electrostatic energy in a gradual and controlled manner to protect electrical components.

- > Plastic dipped is our most basic handle and is easy to maintain and clean of oils and residues.

- > Our component handles offer comfort and ease of use making them great for repetitive work where comfort is a key need.

Additional Features

Other features include lead catcher, double springs and carbide cutting edges.

Handle Type		
Non-ESD	ESD	
Plastic Dipped		
Single-component		ESD
Multi-component		

ESD pliers

Semi-flush, flush and super (ultra) flush

- > Electrostatic energy is discharged through the handles in a gradual and controlled manner

- > ESD handles protect electrical components from electrostatic discharge

- > KNIPEX ESD handles are in accordance with applicable standards

- > IEC TR 61 340-5

- > DIN EN 61 340-5

- > SP Method 2472

Precision Electronics Gripping Pliers

DIN ISO 9655

34

- > for very precise assembly work, e.g. in electronics and fine mechanics
- > for gripping, holding and bending
- > smoothly ground gripping surfaces
- > approx. 20% lighter than conventional electronics pliers
- > bolted joint and carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- > double spring for a gentle and even opening
- > ergonomically optimized handles
- > ball bearing chrome steel; forged, manifold oil-hardened

Precision Circlip Pliers

for internal circlips in bore holes

48

With inserted tips for reliable work

Heavy-duty in continuous operation:
up to 10 times longer service life than
turned tips

- > for fitting snap rings into bores, ranging from 5/16" to 5 1/2" (8 – 140 mm) dia.
- > bolted joint: precise, zero-backlash operation of pliers
- > pliers body: chrome vanadium electric steel; forged, oil-hardened
- > inserted tips: spring steel wire, drawn

Style 1

Straight tips

Style 2

90° angled tips

High Precision Quality

Easy and reliable assembly: form-fitting inserted and pressed-in tips made of high-density spring steel offer a high level of protection against excessive stress and strain, e.g. when removing stuck rings. The large supporting surfaces and the position of the tips make it more difficult for the rings to fly off.

Precision and durability

High-density spring steel with a score-free surface is used for the tips. This increases the tips' resistance to dynamic and static strain. The tips are 30% more stable than conventional pliers when subjected to one-off overloading while still allowing good accessibility during assembly. Subjected to dynamic strain, the tips' resistance capacity is up to 10 times greater! The tips on the precision circlip pliers are non-detachable!

Sturdy, inserted tips: made from high-density
spring steel

Tight fit through compression

- > adjustment using Allen Wrench

Style 3

Straight tips with overstretching limiter
(adjustable using end stop)

Style 4

90° angled tips with overstretching limiter
(adjustable using end stop)

KNIPEX Precision Circlip Pliers with overexpansion guard

For the standardized fitting of circlips in the industrial serial production. Particularly manufacturers of sensitive, safety-relevant components (e.g. brakes or gears) highly appreciate the compliance of DIN 471 and 472. The mounting of circlip rings in this case requires pliers with an overexpansion guard or a cone. KNIPEX Circlip Pliers with overexpansion guard meet the requirements and offer a superior durability.

49 11 A2

49 21 A21

High Precision Quality

Easy and reliable assembly: form-fitting inserted and pressed-in tips made of high-density spring steel offer a high level of protection against excessive stress and strain, e.g. when removing stuck rings. The large supporting surfaces and the position of the tips make it more difficult for the rings to fly off.

Spring inside the joint: the spring is protected inside the precision bolted joint. It does not hinder work and cannot get dirty or lost.

Circlips are held securely; large contact faces and the position of the tips make it difficult for the circlip to fly off.

Precision and durability

High-density spring steel with a score-free surface is used for the tips. This increases the tips' resistance to dynamic and static strain. The tips are 30% more stable than conventional pliers when subjected to one-off overloading while still allowing good accessibility during assembly. Subjected to dynamic strain, the tips' resistance capacity is up to 10 times greater! The tips on the precision circlip pliers are non-detachable!

Sturdy, inserted tips; made from high-density spring steel

Special Retaining Ring Pliers

for retaining rings on shafts

DIN ISO 5743

45

- > for fitting horseshoe-shaped spring retaining rings and circlips without grip holes
- > for shaft retaining devices
- > with opening spring
- > chrome vanadium electric steel; forged, oil-hardened

45 10 170

For retaining rings with a minimum ring split gap of 9/64" (3.6 mm)

45 21 200

Angled jaws with centering hole; for snap rings larger than 15/32" (12.0 mm) dia., e.g. for securing drive shaft in the gearbox of a motor vehicle; minimum ring split gap of the rings 3/32" (2.2 mm)

- > universal usage for large circlips with nominal diameters of 16" – 39 3/8" (400 – 1000 mm)
- > reliable opening and closing of the circlips and holding by self-locking precision spindle drive
- > for fitting and removing circlips in one operation
- > circlips are securely held due to short, direct attachment
- > replaceable tips with 15/64" (6 mm) and 23/64" (9 mm) diameters, for perfect adaption to the actuation bores in the circlips
- > optional operation with hexagonal key, ratchet wrench or cordless screwdriver
- > areas of application e.g. wind turbines, tidal power stations, generator construction, hydropower stations, large machine construction (rolling mills, presses), shipbuilding, aerospace – wherever very high forces and torques are transmitted with large shafts and bearings
- > tip material: chrome vanadium electric steel

High Leverage Concreters' Nippers

with high lever transmission

DIN ISO 9242

99

1

25% less effort required compared to conventional concreters' nippers of the same size

Extra-slim form for tying deep mounted steel rods

- > for use when working with concrete steel and binding wire
- > twists and cuts wire in one operation
- > high leverage joint minimizes strain when working with thick binding wires
- > high leverage design reduces strain on tendons and muscles
- > cutting edge hardness (approx. 61 HRC)
- > high-grade special tool steel; forged, multi stage oil-hardened

Bolt End Cutting Nippers

high lever transmission

DIN ISO 5743

61

Powerful, compact, comfortable

- > features a greater cutting capacity and requires less effort than conventional end cutting nippers
- > cuts nails, small bolts and all wires including piano wire
- > exceptional cutting capacity due to high leverage joint
- > cutting edge hardness (approx. 64 HRC)
- > vanadium steel; forged, multi stage oil-hardened

61 02 200

Slim two-color multi-component sleeves for better handling and easier transport; large contact surface on the handles for better allotment of pressure and more comfort at work

High cutting performance: also for piano wire.

61 01 200

61 02 200

Perfect for working with fencing

Almost flush cutting of bolts, nails, etc.

Exceptional cutting performance

- > induction hardened edges cut soft, hard and piano wire
- > cuts material like bolts, nails, rivets, etc. up to 1/4" (6.0 mm) dia.
- > exceptional cutting performance with minimum effort because of new lever action design
- > cutting edge hardness (approx. 64 HRC)
- > chrome vanadium heavy-duty steel; forged, multi stage oil-hardened

Micro-structured cutting edges allow easy cutting of large cross-sections

Gripping surface below the joint for gripping and pulling wires with a diameter from 3/64" (1 mm)

71 12 200

Opening spring and locking device are integrated in the handles for comfortable work and protected transport

71 02 200 T BKA*

Pliers with tether attachment point for tool drop protection system

Micro-structured cutting edges allow easy cutting of large cross-sections

With gripping surface below the joint for gripping and pulling wires with a diameter from 3/64"

Opening spring and locking device are integrated in the handles for comfortable work and protected transport

71 01 160: High cutting force with a length of just 6 1/4" – ideal for small hands

60% less effort required

compared to conventional high leverage diagonal cutters.
The lever-action mechanism ensures an extremely favorable lever ratio with very little friction. The cutting force is about 20 times higher than the handforce applied.

The compact bolt cutters from KNIPEX are now available with longer handles for one and two-handed operation.

Up to a 40-fold increase of manual force

For powerful cutting of larger diameters as well as very hard materials

Two-handed operation for maximum cutting force

- > 60% less effort required compared to high leverage diagonal cutters of the same size

- > 40-fold increase of manual force due to special joint design

- > gripping surface below the joint for gripping and pulling wires with a diameter from 3/64" (1 mm)

- > induction hardened precision blades: cutting edge hardness (approx. 64 HRC)

- > chrome vanadium heavy-duty steel; forged, multi stage oil-hardened

71 01 250

Straight blades

High Leverage Flush Cutter for soft metal and plastic

72

For easy flush cutting of plastic components and soft metal

- > less effort for cutting thicker workpieces due to high leverage design
- > space for hands and flush cutting due to 20° angled head with joint bar on one side
- > opening spring and locking device are integrated in the handles
- > precision cutting edges, induction hardened (approx. 59 HRC) for soft materials
- > chrome vanadium electric steel, forged, multi stage oil-hardened

View: Back of pliers

Copper busbars are cut cleanly and flush

Ideal for the flush cutting of plastic sprues with large diameters.

Powerful, light and universal

Cuts fine strands as well as multi-stranded cables and piano wires

- > box-joint design: high stability and lightweight
- > high cutting performance with minimum effort due to optimum coordination of the cutting edge angle and transmission ratio
- > large opening width for thicker cables
- > cuts all wires precisely, even fine copper wires
- > compact, low weight construction
- > double supported joint axis for heavy-duty work
- > universal usage in the assembly, maintenance and production
- > chrome vanadium heavy-duty steel; forged, multi stage oil-hardened

Box-joint design: high stability and lightweight

1000 V

X-Cut®

40 % less effort required

compared with standard diagonal cutters of the same length.
With double mounted hinged joint.

Superior high leverage diagonal cutter with patented double joint

- > ideal transmission of force due to double-hinged design
- > reliably cuts all types of wire, including steel tape
- > for rough or very fine cutting
- > for comfortable cutting, repetitive cutting or extremely hard cutting jobs
- > high degree of stability and zero backlash due to precisely milled forged-in axle
- > chrome vanadium heavy-duty steel; forged, oil-hardened

73 71 180

73 72 180

Insert the wires as close to the hinge as possible. In case of cutters with very high transmission, the width of the gap between the cutting edges close to the fulcrum may be less than the thickness of the wire. Wires may slip forward when the cutting starts.

Continue cutting in the same location along the wire. Now cutting is much easier because the wire remains in place closer to the fulcrum.

NEW for diagonal cutters:

The option to reapply the tool. The KNIPEX TwinForce® cuts even $5/32"$ (4 mm) thick wire without great effort when reapplied two or three times. Conventional high leverage diagonal cutters either cannot cut these diameters or only with very great effort.

Extremely easy cutting with little strain:

cuts 50% easier than KNIPEX high leverage diagonal cutters of the same size

First make a notch in the wire using the KNIPEX TwinForce® until the required hand force increases considerably. Now open the pliers and slide the wire backwards towards the joint.

You can repeat this process if necessary.

TwinForce®

- > for fine cutting work in electronics and fine mechanics
- > electrically discharging handles – dissipative
- > sturdy, zero backlash box-joint
- > low-friction double spring for gentle and even opening
- > the mirror polish with a fine film of oil, offers effective rust protection – no circuit faults caused by peeling chrome from plated tools
- > induction hardened cutting edges (approx. 60 HRC)
- > ball bearing steel

77 02 115 ESD

Round head, with small bevel; cutting edge hardness approx. 60 HRC

77 12 115 ESD

Round head, with bevel and lead catcher - no uncontrolled loss of cut wire ends; cutting edge hardness approx. 62 HRC

77 22 115 ESD

Round head, without bevel; cutting edge hardness approx. 57 HRC

77 32 115 ESD

Pointed head, with small bevel; cutting edge hardness approx. 60 HRC

77 42 115 ESD

Pointed head, without bevel; cutting edge hardness approx. 57 HRC

77 52 115 ESD

Pointed, flat head, with small bevel; cutting edge hardness approx. 60 HRC

77 72 115 ESD

Pointed mini-head, with small bevel; cutting edge hardness approx. 60 HRC

Electronics Diagonal Cutters

with inserted carbide metal cutting edges

DIN ISO 9654

77

H

- > for extreme demands on cutting pliers caused by hard or tough materials, e.g. piano, nickel, tungsten and diode wire, which are used more frequently in the electronics and aerospace industries
- > precision carbide metal cutting edges soldered into forged blanks
- > sturdy, zero backlash box-joint
- > hardness of the carbide cutting edges (approx. 80 – 83 HRC)
- > pliers with carbide metal cutting edges have a substantially longer service life than with conventional cutting edges
- > constantly reliable cutting results due to the avoidance of cutter deformations
- > high cost savings due to longer service life of the pliers

Now available in a 5 1/2" version. The added 1/2" length is for greater stability and cutting performance.

- > precision ground cutting edges without bevel for flush cutting the finest of wires e.g. in electronics and precision engineering
- > precisely shaped tips also cut adjacent wires from 1/64" (0.20 mm) diameter
- > opening spring and opening limiter user-friendly handle width
- > extremely smooth movement for minimum operator fatigue

78 03 140 / 78 03 140 ESD

Durable and stainless, made from INOX surgical steel, cutting edges hardened to 54 HRC

78 61 140 / 78 61 140 ESD

Heavy-duty, made from burnished special tool steel, cutting edges induction hardened (approx. 64 HRC)

78 03 140 ESD / 78 61 140 ESD

Allows electrostatic energy to discharge through the handles protecting components from electrostatic discharge

5 1/2" (140 mm) length: stronger and extremely versatile.

For flush cutting, e.g. to shorten cable ties

Shear cut blade design for precise cutting

The Subtle Difference

KNIPEX precision electronics pliers are made of high-quality ball bearing steel and processed with the highest degree of care. Each opening movement is gentle and even without backlash. Each work step proceeds reliably and precisely. This makes work much easier for professionals.

Sets of pliers can be found on page 203

Electrically discharging handles – dissipative

- > precision pliers for ultra fine cutting work in electronics and fine mechanics
- > very precisely ground and sharp cutting edges with very small bevels for precise cutting work on small electronic components
- > cutting edge hardness (approx. 64 HRC)
- > approx. 20% lighter than conventional electronics pliers
- > bolted joint with particularly carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- > double spring for a gentle and even opening
- > ergonomically optimized handle covers
- > ball bearing chrome steel; forged, multi stage oil-hardened

ESD Pliers (electrostatic discharge)

Electrostatic energy is discharged through the handles in a gradual and controlled manner which protects components endangered by electrostatic discharge in accordance with applicable standards e.g. IEC TR 61 340-5, DIN EN 61 340-5, SP Method 2472

KNIPEX SmartGrip®

Water Pump Pliers with automatic adjustment

DIN ISO 8976

- > ideal for frequent changeovers to workpieces of different sizes
- > automatic adjustment for one-hand operation both for right-handed and left-handed use
- > good access to the workpiece due to the slim dimensions in the head and joint area and flush joint bolt
- > self-locking on pipes and nuts: no slipping off the workpiece and low handforce required
- > gripping surfaces with special hardened teeth, teeth hardness (approx. 61 HRC): low wear and reliable gripping
- > box-joint design: high stability because of double guide
- > pinch guard prevents operators' fingers being pinched
- > locking lever for space saving transport with reliable closed handles
- > chrome vanadium electric steel; forged, multi stage oil-hardened

Spring Hose Clamp Pliers

85
51

Removing spring hose clamps has never been easier. These Hose Clamp Pliers have rotatable tips, making them maneuverable from different angles and easier to use in confined areas.

7 1/4" version is perfect for smaller engines up to 2"

10" version can be used on a variety of clamps up to 2 3/4"

> rotatable tips for securely gripping the clamps in all positions.

> jaw inserts can also be rotated under load.

> extremely good leverage which allows clamps to be opened and moved easily without great effort

> slim head design, narrow head width, and rotatable grip inserts make this an ideal tool especially in confined areas

> detach hoses gently using the serrated jaw behind the tips

> chrome vanadium electric steel; forged, oil-hardened

85 51 180 A

85 51 250 A

A single pair of pliers for various sizes of clamps up to 2 3/4" diameter. Rotating jaw inserts enable them to adapt to any position while still guaranteeing that clamps are securely positioned in the pliers.

APPLICATION AREAS CARS/TRUCKS

Air suction, cooling, charge air, water return, thermostat, fuel, heating

Hose Clamp Pliers for Click Clamps

85

51

Opening and closing Click Clamps does not require a special skill; it requires a special tool. No need to replace the OEM clamp with a screw clamp, these pliers will not harm the clamps they're compressing, allowing them to be reused over and over again.

- > rotating tips for reliably gripping of clamps in any position
- > high leverage allows clamps to be opened and closed again comfortably and easily without a great deal of effort
- > for easy working on fuel hoses, vacuum pipes with suction nozzles and many other applications
- > detach hoses gently using the serrated jaw behind the tips
- > slim head design, narrow head width, and rotatable grip inserts make this an ideal tool especially in confined areas
- > chrome vanadium electric steel; forged, oil-hardened

Pliers Wrenches

Pliers and a wrench in a single tool

DIN ISO 5743

86

Replaces a full set of inch and metric open end wrenches

Smooth jaws for damage free installation of plated fittings – working directly on chrome!

- > adjustable tightening tool
- > excellent for gripping, holding, pressing and bending applications
- > zero backlash jaw surface pressure prevents damage to edges of sensitive components
- > adjustment at the touch of a button directly on the workpiece
- > parallel jaws allow infinitely variable gripping of all widths to the specified maximum size
- > reliable catching of the hinge bolt: no unintentional shifting
- > the action of the jaws allows bolted connections to be tightened and released quickly using the ratchet principle
- > lever transmission greater than 10 - 1 for strong gripping power
- > chrome vanadium electric steel; forged, oil-hardened

Length 5"

Mini pliers wrench for precision mechanics; particularly suitable for working on small bolted connections; very good access in very confined spaces

Pliers wrench: zero backlash contact pressure; no damage to edges

Conventional open end wrench: edge pressure causes surface damage on edges of nuts and bolts

10" Version: opening width laser-etched onto the pliers head (metric on the front and imperial on the back)

Fast adjustment by pushing a button

Working on plated fittings without damaging the surface.

Replaces a full set of inch and metric open end wrenches.

Ideal for bending work.

Opening width laser etched onto the pliers head (metric on the front and imperial on the back).

The smooth jaws grip all parallel surfaces in the capacity range with a high degree of pressure if necessary and open up almost unlimited application possibilities for the pliers wrench: e.g. for tightening locknuts, exerting pressure to activate the adhesive power of contact adhesives, edge breaking in tile work, snapping cable ties, utilization as a small vice.

Pliers Wrench XL

Pliers and a wrench in a single tool

DIN ISO 5743

86

03

The unique installation tool now in 16" (400 mm) length

For opening widths up to 3 3/8" (85 mm)

- > excellent for gripping, holding, pressing and bending applications
- > optimized adjustment to the workpiece with hand-friendly position of grips
- > reliable catching of the hinge bolt: no unintentional shifting
- > lever transmission greater than 10 – 1 for strong gripping power
- > adjustable tightening tool
- > replaces diverse, expensive, large open end wrenches up to 3 3/8"
- > parallel jaws allow infinitely variable gripping of all widths to the specified maximum size
- > smooth jaws, for gentle installation of quality union joints made from brass, red brass or stainless steel
- > zero backlash jaw surface pressure prevents damage to edges of sensitive components
- > the action of the jaws allows bolted connections to be tightened and released quickly using the ratchet principle
- > adjustment at the touch of a button directly on the workpiece
- > chrome vanadium electric steel; forged, oil-hardened

Open end wrenches with fixed opening widths are expensive, especially when used for large union joints.

The KNIPEX Pliers Wrench XL, with its' adjustable jaw opening up to AF 3 3/8" (85 mm), offers enormous savings potential.

86 03 400 US

Product Number	Packaging	↔ inch mm	Pliers	Handles	∅ Inch mm	Adjustment positions	Dimensions

adjustable tightening tool – replaces diverse, expensive, large open end wrenches

parallel jaws give a more solid grip; its design allows flexible adjustment up to a maximum size of 3 3/8"

smooth jaws, for damage free installation of quality union joints made from brass, red brass, stainless steel or chrome plated material

zero backlash jaw pressure prevents damage to edges of sensitive components

the ratchet type principle allows quick and easy tightening and release of bolted connections

push-button for adjustment on the workpiece

- > adjustment at the touch of a button directly on the workpiece
- > fine adjustment for optimum adaptation to different size workpieces and a comfortable gripping position
- > self-locking on pipes and nuts: no slipping off the workpiece and low handforce required
- > gripping surfaces with special hardened teeth, teeth hardness (approx. 61 HRC): low wear and reliable gripping
- > box-joint design: high stability because of double guide
- > reliable catching of the hinge bolt: no unintentional shifting
- > pinch guard prevents operators' fingers being pinched
- > chrome vanadium electric steel; forged, multi stage oil-hardened

KNIPEX Cobra® – the High-Tech Water Pump Pliers

No more time-consuming test-adjusting of the correct opening size.
Just position the upper jaw to the workpiece, push button and slide close the lower jaw, ingeniously simple.

Teeth set against the direction of rotation have a self-clamping effect and prevent slipping off the workpiece

The Original Push-Button Pliers

- > greater gripping capacity and lighter weight than comparable pipe gripping wrenches
- > fast push-button adjustment directly on the workpiece, no unintentional slipping of the joint
- > fine adjustment for optimum adaptation to different size workpieces and a comfortable gripping position
- > self-locking on pipes and nuts: no slipping off the workpiece and low handforce required
- > gripping surfaces with special hardened teeth, teeth hardness (approx. 61 HRC): low wear and reliable gripping
- > box-joint design: high stability because of double guide
- > pinch guard prevents operators' fingers being pinched
- > chrome vanadium electric steel; forged, multi stage oil-hardened

Cobra®

The KNIPEX Cobra® XL and XXL offer the power and comfort of water pump pliers while being lighter in weight and having a greater gripping capacity than comparable pipe wrenches. The Cobra® XL can grip a 3 1/2" pipe coupling and weighs 50% less than 2" pipe wrenches, which have a much lower gripping capacity. With its compact length of 16" (400 mm), the Cobra XL is perfect for the plumber's toolbox.

The Cobra® XXL with its capacity of up to 4 1/2" only weighs as much as a 2" pipe wrench. It's 22" size makes it the biggest pliers around!

Fine adjustment by pushing a button;
fast and comfortable

2

Fully open, push, grab!

Fast adjustment on the workpiece by sliding the pliers handle

- > combines the proven, reliable locking of the hinge bolt with an additional push function which makes it easier to work in very confined and inaccessible areas
- > adjustment directly on the workpiece by sliding the pliers handle
- > reliable locking of the hinge bolt with the first workload. The gripping width of the pliers is then fixed and can only be adjusted by pressing the button
- > the pliers stay locked in place and can only be readjusted by pressing the button and resetting
- > chrome vanadium electric steel; forged, multi stage oil-hardened

Press the button – open pliers completely

Position top jaw and simply slide and close pliers

The push-button stays locked in place once the handles are squeezed

Proven Cobra® functions

- > self-locking on pipes and nuts: no slipping off the workpiece and low handforce required
- > fine adjustment for optimum adaptation to different size workpieces and a comfortable handle width

KNIPEX Raptor™ Pliers

DIN ISO 5743

87

4

- > for inch and metric nuts and screws with widths across flats from 3/8" - 1 1/4" (10 - 32 mm); self-locking in the range from 11/16" (17 mm): no slipping off the workpiece
- > reliable and tight gripping of rounded, rusty or overly painted nuts and screws
- > ideal for work on vehicle brake systems
- > quick tightening of nuts and bolts using ratchet action
- > adjustment at the touch of a button directly on the workpiece, one-hand operation
- > fine adjustment for optimum adaptation to different size workpieces and a comfortable gripping position
- > box-joint design: high stability because of double guide
- > reliable catching of the hinge bolt: no unintentional shifting
- > favorable lever action: optimum transmission of force
- > pinch guard prevents operators' fingers being pinched
- > replaces a set of wrenches, ideal for tightening locknuts
- > chrome vanadium electric steel; forged, multi stage oil-hardened

87 41 250

The Raptor Pliers combines the convenience of the comfortable push-button adjustment on the workpiece and the function of an all-purpose tightening tool. Jaw gripping with zero backlash prevents slipping on the bolt head or rounding edges.

Even rusty or thick coated bolted connections which have no surfaces capable of being gripped reliably by a conventional wrench can be managed by the exceptionally powerful closing gripping jaws of this wrench.

Grips rusted nuts with rounded edges

Self-locking: no slipping off workpieces; less effort required

Raptor™ Pliers as the second spanner for tightening locknuts

- > enlarges holes in tiles and forms tile edges
- > special tool steel; forged, oil-hardened

91 00 200

Product Number	Packaging	Inch mm		Pliers	Head	lbs
91 00 200		8 200		black atramentized	polished	0.35

Work without cutting-off machine, particularly for fine strips.
For less mess, dust, noise and effort.

For the precise cutting (breaking) of tiles and porcelain stoneware after scoring with a tile cutter

Ideal for long and thick tiles

- > parallel jaws evenly distribute force that is 10x your strength
- > a precise cut of floor or wall tiles after scoring with a tile cutter
- > replaceable plastic positioning jaw tilts for a clean break line and optimum protection of the tiles against damage
- > chrome vanadium electric steel, forged, oil-hardened

Hog Ring Pliers

91

92

- > for the professional replacement of automotive upholstery to the seat frame compatible with all popular upholstery rings or hog rings
- > recessed groove located in the jaws securely hold the hog rings in the proper position before they are crimped
- > closing spring holds the pliers closed which allows for the ring to be securely positioned before being compressed
- > high transmission ratio allows for easy compression of the hog rings
- > multi-component grips for added hand comfort
- > durable and strong
- > special tool steel; forged, oil-hardened

Reliable use for repairs to car seats, e.g. to renew seat cover,
replace sensor or seat heating mats

- > for cutting copper and aluminum cables, single and multi-stranded wire
- > not suitable for steel wire and hard drawn copper conductors
- > precision ground, hardened blades
- > clean and smooth cut without crushing and deformation
- > easy cutting with one-hand operation
- > pinch guard prevents operators' fingers being pinched
- > adjustable bolted joint, self-locking
- > high-grade special tool steel; forged, oil-hardened

Style 2

Internal opening spring, protected and captive

Style 4

Multifunctional tool for working on NYM cable from $3 \times 1.5 \text{ mm}^2$ to $5 \times 2.5 \text{ mm}^2$ (cutting, stripping insulation); universal stripping area for both solid conductor cross-sections; reliable alignment of the cable in the stripping area due to V-shaped blade geometry

95 12 165 T BKA*

Pliers with integrated tether attachment point for tool drop protection system

Cut performed with a Diagonal Cutter: high effort required, inaccurate cut, considerable deforming and crushing of the cable

Cut performed with a Cable Shear: easy, clean cut without any deformation of the cable

The locking device keeps shears with spring inside the joint closed

Cable Shears

with twin cutting edge

95

1

- > for cutting copper and aluminum cables
- > not suitable for steel wire and hard drawn copper conductors
- > precision ground, hardened blades
- > clean and smooth cut without crushing and deformation
- > by dividing the cutting actions into initial cut (insulating sheath in the front cutting area) and final cut (conductor in the back cutting area), cables up to 25/32" (20 mm) dia. can be cut in one-hand operation
- > less effort required due to favorable lever ratio and optimized cutting-edge geometry
- > pinch guard prevents operators' fingers being pinched
- > adjustable bolted joint, self-locking
- > high-grade special tool steel; forged, oil-hardened

Initial cut: using the front cutting edge to cut the insulating sheath on larger cable diameters leaves an ergonomic handle opening width.

Final cut: after cutting the sheath in the front profile the conductors are cut in the rear area.

Cable Shears

with ratchet action and telescopic handles

95

32

Cable shears with adjustable telescopic handles allow angular positioning.

- > for cable diameters up to 1 1/2" (38 mm), handles can be positioned at an angle to set the optimum handle width, great for work in confined areas
- > comfortable work due to ratchet action and lightweight
- > heavy-duty telescopic handles made of oval aluminum tubing; extendable up to 30" (770 mm) for maximum leverage on large cable diameters; retractable down to 22" (570 mm) for minimum space requirements during transport
- > replaceable cutting head
- > extensive cutting range up to 1 1/2" (38 mm) dia. or 550 MCM (280 mm²) in copper and aluminum cables
- > easier, neater cut due to optimized cutting edge geometry
- > adjustable bolted joint
- > cutting head: special quality, high-grade tool steel, oil-hardened
- > handles: high-strength oval aluminum tubing

95 32 038

Handles are adjustable in length and angular position for easier work. Set the handle length to the optimum position for powerful cutting; put the handles at an angle for a comfortable gripping position.

Setting of a favorable handle width

Thorough cut of the cable by repeat cutting and opening actions

After the first partial cut, the handles open by ratchet action

Cable Cutters (ratchet action)

for steel wire armored cable (SWA-Cable)

95

Cuts through steel wire armored cable with a diameter of up to 45 mm / 380 mm² (e.g. 4 x 95 mm²) using one or two-handed operation

- > simple handling due to lightweight (1.82 lbs) and compact design (315 mm length) – can also be used in confined areas
- > precision ground blades and induction hardened cutting edges cut smoothly and neatly without crushing
- > innovative high leverage three-stage ratchet-drive
- > flange on the handle can be used as a support surface when cutting larger diameters
- > high-grade special tool steel, forged, oil-hardened
- > not suitable for cutting ACSR cable and wire rope!

Cross-section of a steel wire armored cable

Sturdy, easy to use and stable

Innovative ratchet drive

- > Manual ratchet-action cable cutter for one-hand and two-handed operation for cutting copper and aluminum cables with diameters of up to $2\frac{23}{64}$ " (60 mm)
- > easy handling due to light weights (1.82 lbs) and compact construction (12 1/2" / 320 mm length) – suitable for use in confined areas
- > cuts through copper and aluminum cables with diameters of up to $2\frac{23}{64}$ " (60 mm) in one-hand and two-handed operation
- > hardened cutting edges, precisely ground, cut smoothly and neatly without crushing
- > for cutting copper and aluminum single conductors as well as multi-stranded cables (not suitable for steel wire and wire ropes)
- > innovative 3-stage ratchet-drive with high leverage for easy cutting in one-hand and two-handed operation
- > flange on the handle can be used as a support surface when cutting larger diameters
- > high-grade special tool steel; forged, oil-hardened

95 32 320
⊕ MM S

The innovative three gear drive permits three operating modes

- > Fast working with full lift of handles and one-hand operation when cutting through insulation material
- > Powerfully sliding the sickle knife forward when cutting through the stranded conductor with two hands through use of the central lifting area (handle opening of between 1/3 and 2/3 of total range)
- > Powerfully pushing the sickle knife forward with one hand to cut through the stranded conductor through use of the first third of the handle lift with one or two hands

First manual ratchet-action cable cutter for one-hand and two-handed operation for cutting copper and aluminum cables with diameters of up to $2\frac{23}{64}$ " (60 mm)!

Wire Rope Cutter

95

Compact size, lightweight, high performance level

High transmission joint design makes cutting 20 % easier

Box joint design for greater stability

- > for cutting high-strength wire ropes up to up to 5/32" (4 mm) and cable 3/16" (6 mm)
- > at just 6 1/4" (160 mm) length this tool is considerably more powerful than many larger wire rope cutters
- > included thumb lock and opening spring
- > ball bearing steel for a long service life
- > induction hardened cutting edges
- > cuts cleanly and evenly without wire ends splaying or fanning out

- > just one tool for the most common crimping applications
- > crimping dies change quickly and easily without any additional tool
- > secure and protected storage of the interchangeable dies in a round magazine
- > comfortable, powerful crimping pliers
- > same reliable crimping results as with fixed crimping dies
- > repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- > chrome vanadium electric steel in special quality; oil-hardened
- > round magazine: plastic, fiberglass-reinforced

1. Changing position: service lever opens out for parallel jaw positioning

2. Changing the crimp die: unlock the magazine position, take the crimp dies out of the pliers.

3. Fold in the service lever and press the pliers – ready for use again!

97 33 01

97 33 01

Crimping Pliers with round magazine and three interchangeable crimping dies for:

- > non-insulated open plug-type connectors (4.8 + 6.3 mm width) from 1/64-15/64" (0.5 - 6.0 mm²)
- > insulated terminals, plug connectors and butt connectors from 1/64-15/64" (0.5 - 6.0 mm²)
- > insulated and non-insulated ferrules (end sleeves) from 1/64-15/64" (0.25 - 6 mm²)

Now also for insulated and non-insulated end sleeves (ferrules)

10, 16, 25 mm²

Universal indent crimping die for non-insulated connectors

97 33 02

97 33 02

Crimping Pliers with round magazine and five interchangeable dies for:

- > non-insulated open plug-type connectors (plug width 4.8 + 6.3 mm) from 1/64-15/64" (0.5 - 6.0 mm²)
- > insulated terminals, plug connectors and butt connectors from 1/64-15/64" (0.5 - 6.0 mm²)
- > insulated and non-insulated ferrules (end sleeves) from 1/64-15/64" (0.25 - 6 mm²)
- > insulated and non-insulated ferrules (end sleeves) with 10 / 16 / 25 mm² and for non-insulated crimp terminals
- > tube and compression cable lugs in accordance with DIN 46234 and DIN 46235
- > non-insulated crimp, butt and press connectors in accordance with DIN 46341 and DIN 46267

Compact and lightweight crimping pliers for connectors.

One tool does the job of five.

Magazine for crimp dies can be carried on a belt

Clearly visible marking on the crimping dies with pictograms

Crimping Pliers

with side cutter for Scotchlok™ connectors

97
50

- > for crimping plastic-insulated telecommunication or signal cables using the U-contact principle in single Scotchlok connectors
- > no stripping necessary, U-shaped elements make the connection
- > induction hardened cutting edges
- > includes opening spring for easy repetitive work
- > vanadium electric steel; forged, oil-hardened

Before

After

Scotchlok™ is a registered trademark for 3M

Product Number	Packaging	Inch mm	Type of Connector	Head	Handles	Applications	Capacity Ø Inch Ø mm	ΔΔ lbs

- > professional tool for cutting and stripping unshielded ribbon telephone cables
- > for crimping 6- and 8-pole Western plugs type RJ 11/12 (3/8" / 9.65 mm width) and type RJ 45 (15/32" / 11.68 mm width)
- > exact crimping process due to parallel crimping
- > repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > length cutter and dismantling knife for ribbon cables 1/4" and 1/2" (6 and 12 mm) length
- > additional stripping device for round cables
- > chrome vanadium electric steel in special quality; oil-hardened
- > 97 51 12 is for crimping 4-, 6- and 8-pole Western plugs type RJ 10 (7.65 mm width), type RJ 11/12 (9.65 mm width) and type RJ 45 (11.68 mm width)

97 59 12 Spare set of blades for 97 51 12

- > for solder-free electrical connections
- > the lever transmission reduces the handforce up to 30% compared with regular crimping pliers
- > repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- > crimping pressure has been set precisely (calibrated) in the factory
- > two-handed operation for easy crimping of large conductor diameters
- > easy handling as a result of well-balanced center of gravity, angled head and ergonomically shaped handles
- > chrome vanadium electric steel in special quality, oil-hardened

97 52 04

97 52 06

97 52 10

First step: place the connector into the correct crimping position. Squeeze handles slightly to secure connector inside die.

Second step: insert wire into connector and squeeze handles to complete crimp.

Third step: handles are long enough for two-handed operation. Handles will release automatically when the crimp is complete.

- > for crimping turned contacts
- > four-mandrel crimping for top-quality crimping connections
- > mandrel gauge to check the basic setting
- > repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > optimum transmission of force due to highly effective lever action for fatigue-reduced operation
- > high operation comfort due to ergonomic shape
- > chrome vanadium electric steel in special quality; oil-hardened

97 52 63 DG

Crimping capacity can be adjusted in increments of .0004" (0.01 mm); with digital display of the preset crimping capacities; adjustment in mm, inches or comparable selection positions according to MIL; packaged in a plastic case with foam insert and locator for holding the contacts

97 52 64

Pressure adjustment depending on the conductor's diameter by means of adjusting wheel in 4 different positions; locator for positioning the contacts

97 52 65

Fine adjustment of pressure depending on the conductor's diameter by means of adjusting wheel; locator for positioning the contacts; with table for calculating the settings; pliers in a plastic case with foam insert

97 52 65 DG

Crimping capacity can be adjusted in increments of .0004" (0.01 mm); with digital display of the preset crimping capacities; adjustment in mm, inches or comparable selection positions according to MIL; with table for calculating the settings; packaged in a plastic case with foam insert and locator for holding the contacts

Turned contacts are used for particularly demanding plug-type connections, e.g. in medical industry and aviation. Extremely reliable crimping connections can be achieved only with pliers that work with absolute precision and maintain the required crimping depth in the 1/100 mm range. KNIPEX has all of the tools you need to get these jobs done.

Self-Adjusting Crimping Pliers

with side-loading mechanism for ferrules (end sleeves)

97

53

Narrow handle width and improved ergonomics

- > for crimping ferrules (end sleeves) according to DIN 46228 parts 1 + 4
- > self-adjustment to the size of ferrules (end sleeves) required
- > repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > crimping pressure has been set precisely (calibrated) in the factory
- > optimum transmission of force due to toggle lever for fatigue-reduced operation
- > high operation comfort due to hand shape and low weight
- > chrome vanadium electric steel in special quality; oil-hardened

97 53 04

Square compression for ferrules (end sleeves) up to 6 AWG; square compression for ideal contact surfaces in the clamp connection; particularly suitable for all twin ferrules (end sleeves) up to 2 x 6 mm² or 2 x AWG 8

97 53 14

Expanded capacity of hexagonal crimping up to 1 AWG; hexagonal compression for confined connection dimensions; particularly suitable for all twin ferrules (end sleeves) up to 2 x 4 mm² or 2 x AWG 10

97 53 04

97 53 14

Crimping capacity can be switched over simply from 8 AWG (10 mm²) to 6 AWG (16 mm²)

Square compression

Hexagonal compression

The small crimping pliers for ferrules (end sleeves) with two major advantages for the user:

- > Automatic adjustment to the end sleeves, making work easier for the professional and offers reliable and fast crimping
- > Expanded range of applications

WARNING: This product can expose you to chemicals including Diisobutyl Phthalate, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

KNIPEX Twistor16

Self-adjusting crimping pliers for end sleeves (ferrules)
with rotating crimp head

97

53

Crimp head can be freely rotated 360°, with 8 locking positions
Square crimp profile, high capacity range of 26 to 6 AWG
(0.14 to 16 mm²)

End sleeves (ferrules) can be crimped from almost any working position

- > crimping pliers adjust automatically to different diameters
- > crimp opening is accessible from both sides, extra-long end sleeves can be fed in
- > crimping of twin end sleeves (ferrules) up to 2 x 6 mm² possible
- > repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > light and handy tool, manual force reinforced by toggle lever mechanism
- > chrome vanadium electric steel in special quality; oil-hardened

97 53 18

Crimp head can be rotated 360°

Crimp head can be rotated 360° for optimal accessibility, even in confined spaces

Twin end sleeves (ferrules) up to 2 x 6 mm² can be crimped without adjustment

Crimp end sleeves (ferrules) fully automatically within the capacity range of 26 to 6 AWG (0.14 to 16 mm)

Uniquely flexible: connectors can be inserted in the rotatable crimp head from almost any position

Product Number	Packaging	Inch mm	Capacity mm ²	AWG	Number of crimping positions	lbs
97 53 18		8 200	0.14 - 16	26 - 6	1	1.05

Self-adjusting Crimping Pliers

with front loading mechanism for ferrules (end sleeves)

97

53

- > for crimping ferrules (end sleeves) according to DIN 46228 parts 1 + 4
- > self-adjusting adaptation to the desired wire ferrule (end sleeves) size: no crimping faults caused by using the wrong die
- > front-loading of the ferrules (end sleeves) into the tool
- > repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > crimping pressure has been set precisely (calibrated) in the factory
- > optimum transmission of force due to toggle lever for fatigue-reduced operation
- > high operation comfort due to handle shape and low weight
- > chrome vanadium electric steel in special quality; oil-hardened

97 53 08

Crimping from 28 - 8 AWG (0.08 - 10.0 mm²) in one profile; wire ferrules (end sleeves) up to 14 AWG (2.5 mm²) can also be loaded parallel from the side; particularly suitable for all twin ferrules (end sleeves) up to 2 x 4 mm² or 2 x AWG 10

97 53 09

Crimping from 28 - 8 and 6 AWG (0.08 - 10.0 and 16.0 mm²) in one profile; with selector lever for setting the crimping area either to 28 - 8 and 6 AWG (0.08 - 10 mm² or 16 mm²); particularly suitable for all twin ferrules (end sleeves) up to 2 x 6 mm² or 2 x AWG 8

97 53 08

97 53 09

Square crimping

Front-loading of ferrules (end sleeves) e.g. in switchboards

97 53 08: Lateral loading of ferrules (end sleeves) up to 14 AWG (2.5 mm²) parallel from the side e.g. in confined areas.

Square compression

The crimping pliers for wire ferrules (end sleeves) with three great advantages for the user:

- > Automatic self-adjustment to the wire ferrules (end sleeves): This allowing the professional to work with less strain and enables secure, reliable and quick crimping
- > Range of applications for large cross-sections: crimping 28 - 8 and 6 AWG (0.08 to 10.0 + 16.0 mm²)
- > Front-loading: very helpful under difficult working conditions in confined spaces

WARNING: This product can expose you to chemicals including Diisononyl Phthalate, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

Crimping Pliers for wire ferrules (end sleeves)

97

7

Easy crimping due to optimized transmission ratio

Light and slim design

> for crimping wire ferrules (end sleeves) according to DIN 46228 parts 1 and 4 from 5 to 23 AWG (0.25 to 16 mm²)

> crimping in marked half-round dies for secure connections between the sleeve and the conductor

> high-grade special tool steel; forged, oil-hardened

97 71 180

97 72 180

Product Number	Packaging	Inch mm			Head	Handles	Applications	Capacity mm ²	AWG	Number of crimping positions	lbs

Crimping Pliers

with front loading mechanism for wire ferrules (end sleeves)

97

8

> for crimping ferrules (end sleeves) according to DIN 46228 parts 1 + 4 in the range 0.5 to 6 mm²

> ideal for work in confined areas, e.g. in narrow and deep switch boxes

> special tool steel; forged, oil-hardened

Product Number	Packaging	Inch mm	Head	Handles	Applications	Capacity mm ²	AWG	Number of crimping positions	lbs kg
97 81 180	7 1/4 180			polished	plastic coated	ferrules (end sleeves)	0.5 - 6.0	24 - 0	1 0.45

Crimp Assortments

for ferrules (end sleeves)

97

90

- > in a TANOS MINI-systainer® (solid plastic box)
- > T-Loc fastener for one-hand operation: open or close the systainer® with one turn and connect to a second systainer®
- > opening when connected: fast and simple access to content without disconnecting
- > two stackable plastic inserts with 6 trays each for connectors
- > with an assortment of ferrules (end sleeves) with collar

10 Profiles, 2 crosses, 1 key

For all common locking systems

- > multifunctional key for the actuation of locking systems from the areas of facilities engineering (heating and sanitation, air conditioning, electro technology), gas and water supply and shut-off systems.
- > 8-arm version: 2, 4-way wheel wrenches connected in a space-saving way using magnets
- > reversible bit: slot 3/64 x 9/32" (1.0 x 7 mm) and PH2 cross slot
- > key and reversible bit joined by stable stainless steel wire
- > quality surface coating
- > lightweight-optimized zinc die-cast design

TwinKey®

Effective protection against accidents caused by falling tools. The tether attachment is on the multi-component handles.

The tether attachment point for the range with multi-component handles

Tools can fall down anytime you are using them from a high height, for example; when using them on cherry pickers, scaffolding, ladders and by industrial climbers working with wire rope hoists.

KNIPEX offers a wide range of pliers and accessories that can reliably prevent the KNIPEX pliers from falling down.

There is a very stable tether attachment on the inside of the handles which is welded onto the handle for attaching the tether or adapter strap. The lug enables the equipment to be attached and put down quickly. The sophisticated elements from our KNIPEX Tethered Tools Program offers several individual variations for connection and use.

Please read all warnings on product packaging carefully

- > Do not use on live circuits. Always switch off power.
- > Always wear approved eye protection.
- > NO PPE = No Personal Protective Equipment.
- > Only for latching tools from the KNIPEX Tethered Tools range, connected and combined in accordance with this description.
- > Tether extends to length of around 5 feet (1.5 m) rig to avoid contact with objects below.
- > Do not use around moving or rotating equipment.
- > Will not support human weight.
- > Inspect for wear before each use. Do not use if evidence of wear.

Tether attachment: dynamic load capacity for a max. fall height of 10 ft / 3 m by a tool from the KNIPEX TT range.

The Tool Drop Protection System

for tools with tether attachment

- ▶ Versatile application potential ranging from building construction to industrial climbers
- ▶ Reliably prevents the tool from falling down, and can protect against serious injuries, damage to property or loss

Tether

00
50

- > wide working radius: flexible tether for user-friendly work
- > variable fastening options: with strap made of a flat belt sewn to one end and a cord and cord stopper sewn into the other end
- > suitable for all KNIPEX pliers with tether attachment

Adapter Straps

00
50

- > diverse options for fastening in combination with the carabiner and the tether
- > permits fast, safeguarded switching from the fastener on the tool bag to the tether and from one tool to another
- > suitable for all KNIPEX pliers with tether attachment

Carabiners

00
50

- > with screw lock to prevent accidental opening
- > strong and light aluminum design weighing just 1 ounce
- > for connecting adapter strap and tether or to attach these to a fixed point

00 50 04 T BKA: The complete tethering system set

The tether made of gathered fabric tape expands to a length of approx. 5' (1.5 m) when under strain

KNIPEX

When tightened, the screw lock prevents inadvertent opening of the carabiner

KNIPEX

The adapter strap provides the flexible connection between tool and the reliable tether point

Read all warnings before using

Pliers with tether attachment point

Complete range

Pliers range with tether attachment point for a tool tether

	Product Number	Description
	02 02 225 T BKA black atramentized; head polished	High Leverage Combination Pliers, requires 35% less effort than conventional combination pliers.
	08 22 145 T BKA black atramentized; head polished	Needle-Nose Combination Pliers, slim head for use in inaccessible work areas
	09 02 240 T BKA black atramentized; head polished	Lemnian's Pliers, ultra-high leverage design for 25% easier cutting power
	09 12 240 T BKA black atramentized; head polished	09 12 240 T BKA: with a universal terminal crimper and a fish tape puller on the backside
	13 02 614 T BKA black atramentized; head polished	Electrician's Pliers; ideal for cable work, gripping and bending wire or even cutting medium hard and hard wire
	13 82 8 T BKA black atramentized; head polished	Electrical Installation Pliers, multifunctional 6-in-1 pliers for electrical installation; cutting, stripping, crimping, gripping, bending and deburring
	26 12 200 T BKA black atramentized; head polished	Long Nose Pliers w/Cutter, elastic precision tips will not deform or bend and will spring back into place
	26 22 200 T BKA black atramentized; head polished	26 22 200 T BKA: with 40° angled tips for hard to reach spaces
	71 02 200 T BKA black atramentized	KNIPEX CoBolt® Compact Bolt Cutters, particularly high cutting performance with little physical effort.
	71 22 200 T BKA black atramentized	71 22 200 T BKA: 20° angled head with single-sided joint bar and diagonal cutting edge for almost flush cutting
	71 32 200 T BKA black atramentized	71 32 200 T BKA: notch in the blade for cutting thicker wire
	74 02 200 T BKA black atramentized; head polished	High Leverage Diagonal Cutters, high cutting performance with minimum effort. Available in 8" and 10" lengths
	74 02 250 T BKA black atramentized; head polished	
	74 22 200 T BKA black atramentized; head polished	12° angled head in a 8" length
	74 22 250 T BKA black atramentized; head polished	12° angled head in a 10" length

Pliers range with tether attachment point for a tool tether

	Product Number	Description
	86 05 180 T BKA chrome plated	Pliers Wrenches, pliers and a wrench in a single tool, for damage free installation of plated fittings. Available in 7 1/4" and 10" lengths
	86 05 250 T BKA chrome plated	
	87 02 180 T BKA grey atramentized; head polished	KNIPEX Cobra® High-tech Water Pump Pliers, grips any shaped object – round, square, hex or flat. Push-button adjustment means that once the capacity is set, it stays set. Available in 7 1/4", 10" and 12" lengths
	87 02 250 T BKA grey atramentized; head polished	
	87 02 300 T BKA grey atramentized; head polished	
	88 02 250 T BKA black atramentized; head polished	KNIPEX Alligator® Water Pump Pliers, self-locking on pipes and nuts – no slipping off the workpiece, box-joint design for high stability. Available in 10" and 12" lengths
	88 02 300 T BKA black atramentized; head polished	
	95 12 165 T BKA burnished	Cable Shears, precision ground, hardened blades: clean and smooth cut without crushing and deformation
	95 62 190 T BKA head polished	Wire Rope Cutter, special blade geometry prevents the wire rope from fanning out

VDE Pliers range with tether attachment point for a tool tether

	Product Number	Description
	26 16 200 T chrome plated	■ Snipe Nose Side Cutting Pliers, (Stork Beak Pliers), extremely durable, elastic precision tips; half-round, long, pointed jaws
	26 16 200 T chrome plated	■ 26 16 200 T: straight 26 26 200 T: bent
	70 06 160 T chrome plated	■ Diagonal Cutter, slim head for use in inaccessible work areas; available with fall protection in a compact length of 160 mm and a robust 180 mm length
	70 06 180 T chrome plated	■
	74 06 200 T chrome plated	■ High Leverage Diagonal Cutters, high cutting performance with minimum effort; Available with fall protection in lengths of 200 mm and 250 mm
	74 06 250 T chrome plated	■
	87 26 250 T chrome plated	■ KNIPEX Cobra® VDE, High-Tech Water Pump Pliers, push the button for adjustment on the workpiece and nuts
	95 16 165 T chrome plated	■ Cable Shears, precision ground, hardened blades: clean and smooth cut without crushing and deformation

Drop protection system for tools with tether attachment point

	Product Number	Description
	00 50 01 T BK	■ 1 x Tether Wide working radius: the tether made of gathered fabric tape expands to a length of approx. 1.5 m when under strain
	00 50 02 T BK	■ 3 x Adapter straps Flexible connection between tool and the reliable tether point
	00 50 03 T BK	■ 2 x Carabiner When tightened, the screw lock prevents inadvertent opening of the carabiner
	00 50 04 T BK	■ Tethering System Set For diverse options for attaching KNIPEX pliers using the tether attachment (1 x Tether, 3 x Adapter straps, 2 x Carabiner)

Testing dielectric strength,
subjecting each pair of pliers
to a load of 10,000 V AC.

Insulated tools are a matter of trust

Professionals trust their tools. This trust is vital when working on electrical installations. In this case, the electrician holding the pliers is also holding his life in his hands. Our insulated tools therefore not only meet statutory requirements, but also offer the greatest possible safety, reliability and performance.

Testing the adhesion of the insulating coating at 500 N.

Pressure test at 70°C.

Low temperature impact test.

Testing the electrical insulating properties.

Regulated by standards

Only trained professionals are allowed to work on live installations. Such work is subject to strict occupational health and safety standards such as the German DIN VDE 0105, the international EN 50110 and IEC 60364 and the USA NFPA 70E. In each case they must deploy special tools that have been specifically manufactured and tested for this work. Tools used in live work must meet the requirements determined by DIN EN / IEC 60900 and NFPA 70E. KNIPEX tools which bear the special mark $\triangle 1000V$ are approved for work up to 1000 V AC.

Guaranteed individually checked

Every insulated tool undergoes, one by one, a dielectric strength at 10,000 V AC before we sell it. This means that work in the area up to 1,000 V AC has a safety buffer of ten times the permitted maximum limit. Other procedures check the reliability of the insulation towards heat, cold, tensile and impact force. In addition to the KNIPEX quality assurance team, external institutes and test centers such as the VDE guarantee that all insulated criteria have been satisfied. We stand by this responsibility with our name on the insulation of KNIPEX tools.

Strong beneath the insulation

The insulation provides safety when handling electrical installations, but the mechanical properties of the basic tool, such as cutting performance, precision and stability remain the other key-factor for a reliable function of insulated tools.

With our insulated pliers, users can depend on the quality and durability of products from KNIPEX production. For assembly tools insulated by us, we use basic tools from tried and tested suppliers whose quality we subject to regular, stringent checks. The expert can rely on this double dependability of tool and insulation.

Always comply with the current valid regulations and observe the SAFETY INSTRUCTIONS given below:

- > Insulated tools must be transported in a manner that will prevent any damage to the insulation.
- > Check before every use whether the insulation is damaged in any way, defective tools must be discarded.
- > Always keep your insulated tools clean and dry.
- > Wear protective goggles when working with cutting nippers or working overhead.
- > Always wear goggles or a facial mask when working on live equipment.
- > Make sure the workplace is clean and orderly, particularly when you are working on live installations.
- > Wear protective clothing and use SAFETY equipment (e.g. insulating gloves, insulating mats, protective covers) especially in confined working spaces.
- > Use only a tool with suitable dimensions. That will prevent slipping on the workpiece and unintentional contact with non-insulated parts.
- > Make sure that detached parts or cut-off ends of conductors do not fall onto live parts.

High Leverage Combination Pliers

DIN ISO 5746 IEC 60900 DIN EN 60900

02

35% less effort required than with conventional combination pliers

Cutting edge hardness (approx. 63 HRC) for heavy-duty cutting

- > easier work due to high leverage design
- > easier cutting, powerful gripping, bending and pulling
- > long cutting edges for thicker cables
- > gripping zones for flat and round material for a variety of uses
- > high-grade special tool steel; forged, multi stage oil-hardened

Powerful, light and universal

Cuts fine strands as well as multi-stranded cables and piano wires

- > box-joint design: highest stability with low weight
- > high cutting performance with minimum effort due to optimum coordination of the cutting edge angle and transmission ratio
- > large opening width for thicker cables
- > cuts all wires precisely, even fine copper wires
- > double supported joint axis for heavy-duty work
- > compact, lightweight construction
- > universal usage in the assembly, maintenance and production
- > chrome vanadium heavy-duty steel; forged, multi stage oil-hardened

73 06 160
1000V

X-Cut®

40% less effort required

Pliers Wrench

insulated

IEC 60900 DIN EN 60900

86

07

Scale for setting the opening width off the workpiece (metric on the front and imperial on the back)

> pliers and a wrench in a single tool

> excellent for gripping, holding, pressing and bending applications

> zero backlash jaw surface pressure prevents damage to edges of sensitive components

> opening width laser-etched onto the pliers head for setting before putting the tool on the workpiece

> adjustment at the touch of a button directly on the workpiece

> parallel jaws allow infinitely variable gripping of all widths to the specified maximum size

> the action of the jaws allows bolted connections to be tightened and released quickly using the ratchet principle

> lever transmission greater than 10 - 1 for strong gripping power

> chrome vanadium electric steel; forged, oil-hardened

- > adjustment by shifting the jaw directly on to the workpiece: fast, secure and comfortable handling
- > opening at the touch of a button apart from the workpiece
- > fine adjustment for optimum adaptation to different workpiece sizes and comfortable gripping position
- > good access to the workpiece due to slim size in the head and joint area
- > self-locking on pipes and nuts: no slipping off the workpiece and low handforce required
- > gripping surfaces with special hardened teeth, teeth hardness (approx. 61 HRC): low wear and reliable gripping
- > box-joint design: high stability because of double guide
- > pinch guard prevents operators' fingers being pinched
- > chrome vanadium electric steel; forged, multi stage oil-hardened

Cable Shears

IEC 60900 DIN EN 60900

95
1

Cut performed with a Diagonal Cutter:
high effort required, inaccurate cut, considerable deforming and crushing of the cable.

Cut performed with a Cable Shear:
easy, clean cut without any deformation of the cable.

- > for cutting copper and aluminum cables, single and multi-stranded wires
- > not suitable for steel wire and hard drawn copper conductors
- > precision ground, hardened blades
- > clean and smooth cut without crushing and deformation
- > easy cutting with one-hand operation
- > pinch guard prevents operators' fingers being pinched
- > adjustable bolted joint, self-locking
- > high-grade special tool steel; forged, oil-hardened

Cable Shears

with twin cutting edge

IEC 60900 DIN EN 60900

95
1

Initial cut: using the front cutting edge to cut the insulating sheath on larger cable diameters leaves an ergonomic handle opening width.

Final cut: after cutting the sheath in the front profile the conductors are cut in the rear area.

- > for cutting copper and aluminum cables
- > not suitable for steel wire and hard drawn copper conductors
- > precision ground, hardened blades
- > clean and smooth cut without crushing and deformation
- > easy cutting with one-hand operation
- > by dividing the cutting actions into initial cut (insulating sheath in the front cutting area) and final cut (conductor in the back cutting area), cables up to 25/32" (20 mm) dia. can be cut in one-hand operation
- > less effort required due to favorable lever ratio and special blade geometry
- > pinch guard prevents operators' fingers being pinched
- > adjustable bolted joint, self-locking
- > high-grade special tool steel; forged, oil-hardened

KNIPEX presents high-quality and sturdy plastic pliers featuring protection against bridging for working on live parts up to AC 1000V and DC 1500V.

These solid plastic pliers do not act on magnetic fields and are fully spark free. They are also excellent for use in chemically aggressive environments.

INDEX

ACSR Cable Cutter with ratchet action for cables with a steel core.....	167	Crossover Tweezers.....	154
Adjustable Wrench	229	Cutter for ribbon cable.....	155
Alligator® – Water Pump Pliers	138, 220	Cycle Pliers.....	125
Alligator® XL – Water Pump Pliers.....	140	Diagonal Cutter for fiber optics.....	95
Anvil Shears for cutting soft material such as rubber and leather.....	156	Diagonal Cutters	93, 94, 218
Automatic Flat Cable Stripping Pliers.....	40	Diagonal Cutters for electromechanics	102
Automatic Insulation Stripper.....	39, 40	Dismantling Knives	237
Automatic Stripping Pliers.....	41	Dismantling Pliers.....	43
Belt pouch.....	198	Dismantling tool for data cables.....	49
Bolt Cutters	91	Dismantling Tools	47, 48
Bolt End Cutting Nippers – high lever transmission.....	86	Duckbill Pliers	61
Bowden Cable Cutter	167	Ear Clamp Pliers	32
Box Wrenches.....	230	Electricians' Pliers	42
Break-off Pliers for vehicle bodywork.....	83	Electricians' Shears	158
Cable Cutters (ratchet action) for steel wire armored cable (SWA-Cable)	165	Electronic Super Knips®	114, 116
Cable Cutters for Wire Rope and ACSR	169, 227	Electronic Super Knips® XL	117
Cable Cutters with ratchet action	162, 225	Electronics Diagonal Cutters	107, 108, 112
Cable Cutters with ratchet action and telescopic handles	164	Electronics Diagonal Cutters ESD	110, 113
Cable Cutters with ratchet principle, 3-stage	166, 226	Electronics End Cutting Nippers	104
Cable Knife with replaceable blade	238	Electronics End Cutting Nippers ESD	106
Cable Knives	237	Electronics Mounting Pliers	67
Cable Shears	158, 159, 161, 222, 223, 224	Electronics Oblique Cutting Nippers	103
Cable Shears with ratchet action and telescopic handles	163	Electronics Pliers	65
Cable Shears with twin cutting edge	160, 223	Electronics Pliers ESD	66
Carpenters' Pincers.....	82, 83	Electronics Pliers Sets for working on electronic components	203
Circlip Pliers for external circlips on shafts	75	Electronics Wire Stripper	34
Circlip Pliers for grip rings on shafts	80	Electronics Wire Stripping Shears	34
Circlip Pliers for internal circlips in bore holes	74	End Cutting Nippers	87
Circlip Pliers for large external circlips	73	End Cutting Nippers for mechanics	87
Circlip Pliers for large internal circlips	73	ErgoStrip® – Universal Dismantling Tool	50
Circlip Pliers Sets	197, 200	Extension Bars	233
Circlip Tool for internal and external circlips	81	Family Sets	196
CoBolt® – Compact Bolt Cutters	88	Farriers' Pincers	83
CoBolt® "Fencing"	90	Flat Nose Grozing Pliers	148
CoBolt® XL – Compact Bolt Cutters	90	Flat Nose Pliers	51, 216
Cobra® – High-Tech Water Pump Pliers	132, 221	Flat Nose Pliers of plastic	238
Cobra® ES – High-Tech Water Pump Pliers, extra-slim	137	Flat Nose Pliers with cutting edges	52
Cobra® Insulated	136	Flush Cutting Diagonal Pliers for Plastics	95
Cobra® QuickSet	135	Four-Mandrel Crimping Pliers for turned contacts	183
Cobra® XL/XXL – High-Tech Water Pump Pliers	134	Glass Breaking Pincer	147
Cobra®...matic – High-Tech Water Pump Pliers	135	Glass Nibbling Pincers	148
Combination Pliers	28, 214	Grip Pliers	71
Combination Shears	157	Gripping Pliers	60
Compact Bolt Cutters	88, 90	Gripping Pliers for precision mechanics	68
Compact Diagonal Cutter	219	Halogen Bulb Exchange Pliers	60
Compact Diagonal Cutters, high lever transmission	98	Hexagon Sockets	234, 236
Compact Tool Case	241	High Leverage Center Cutters	102
Concrete Mesh Cutter	92	High Leverage Combination Pliers	27, 214
Concreters' Nippers	84	High Leverage Concreters' Nippers	85
Control Cabinet Keys for all standard cabinets and shut-off systems	193	High Leverage Diagonal Cutters	99, 100, 219
Crimp Assortments for ferrules (end sleeves)	190	High Leverage End Cutting Nippers	86
Crimp System Pliers for exchangeable crimping dies	174	High Leverage Flush Cutter for soft metal and plastic	96
Crimping Dies for Crimp System Pliers	175, 176	High-Tech Water Pump Pliers	132, 135, 137
Crimping Pliers	170	High-Tech Water Pump Pliers, Insulated	136, 221
Crimping Pliers for two-handed operation	180	Hog Ring Pliers	148
Crimping Pliers for Western plugs	178	Hose Clamp Pliers for Click Clamps	127
Crimping Pliers for wire ferrules (end sleeves)	188, 227	Installation Pliers	45, 216
Crimping Pliers with front loading mechanism for wire ferrules (end sleeves)	189	Insulated Tools Sets	248
Crimping Pliers with quick changer magazine	172	Insulating Mats	240
Crimping Pliers with short design	181	Insulating Plastic Clamp	239
Crimping Pliers with side cutter for Scotchlok™ connectors	177	Insulation Stripper with replaceable blades	35

Insulation Strippers.....	33, 46, 215
Insulation Strippers with Cable Shears.....	44
Lineman's Pliers	30, 215
Locators for crimping pliers and profiles.....	177
Long Nose Pliers	59, 218
Long Reach Needle Nose Pliers	56
Long Reach Needle Nose Pliers with transverse wave.....	57
Magnetic LED Lamp.....	195
Mechanics' Pliers.....	69
Mini Pliers Sets in belt tool pouch	204
Mini Water Pump Pliers.....	142
Mini Wire Stripper	41
Mitre Shears for plastic and rubber sections.....	155
MultiCrimp® – Crimping Pliers	172
MultiStrip 10 – Automatic Insulation Stripper	39
Needle-Nose Combination Pliers	29, 215
Notching Pliers	145
Nut Drivers with T-Handle	231
Open End Wrenches	228
Parrot beak pincer	146
Pipe and Connector Pliers	122
Pipe Cutter for composite and plastic pipes	144
Pipe Cutter for composite pipes and protective tubes.....	143
Pipe Cutter for flexible pipes and flexible hoses	142
Pipe Cutter for plastic conduit pipes (electrical installation work)	143
Pipe Wrenches 45°	123
Pipe Wrenches 90°	123
Pipe Wrenches S-Type	124
Pipe Wrenches S-Type with rapid adjustment	124
Plastic Slip-On Caps.....	239
Pliers and a wrench in a single tool	130
Pliers Sets	204
Pliers Sets in a foam tray	199
Pliers Sets in plastic deep-drawn packaging.....	201
Pliers Wrench XL	130
Pliers Wrenches	128, 220
PreciForce® – Crimping Pliers	182
Precision Circlip Pliers for internal circlips in bore holes	76
Precision Circlip Pliers Sets	200
Precision Circlip Pliers to assemble external circlips on shafts	78
Precision Electronics Diagonal Cutters	118
Precision Electronics Diagonal Cutters ESD	120
Precision Electronics Gripping Pliers	64
Precision Insulation Strippers with replaceable blades	36
Precision Mechanics Pliers	52
Precision Tweezers	149, 151, 152, 153, 154, 222
Precision Tweezers ESD	150
Profi-Key for all standard shut-off systems	193
PUK® Junior Hacksaw	240
Punch Lock Riveters	144
Raptor™ Pliers	136
Relay Adjusting Pliers	61
Reversible Ratchet	233, 236
Revolving Punch Pliers	146
Round Nose Pliers	52, 216
Round pliers with cutting edge	51
Safety Compact Tool Case	242
Safety Tool Rolls	245
Screwdrivers.....	232
Self-adjusting crimping pliers for end sleeves (ferrules) with rotating crimp head	186
Self-adjusting Crimping Pliers with front loading mechanism for ferrules (end sleeves)	187
Self-Adjusting Crimping Pliers with side-loading mechanism for ferrules (end sleeves)	185
Self-Adjusting Insulation Strippers	38
Self-Clamping Slip-On Caps	239
Shears for KEVLAR® fibers	157
Sheet Metal Nibbler	145
SmartGrip® – Water Pump Pliers with automatic adjustment	125
Snipe Nose Pliers of plastic	238
Snipe Nose Pliers with Center Cutter	56
Snipe Nose Side Cutting Pliers	53, 54, 55, 217
Sockets	235
Special Retaining Ring Pliers for retaining rings on shafts	80
Spring Hose Clamp Pliers	126
Spring Hose Clamp Pliers with locking device	127
Standard Tool Case	244
Stork Beak Pliers	55, 217
Stripping Tool for coaxial cables	48
StriX – Insulation Strippers with Cable Shears	44
Telephone Pliers	56, 58
T-Handle	232
Tile Breaking Pliers	147
Tile Nibbling Pincer	146
Tool Case "BIG Twin Move"	205
Tool Case for photovoltaics	191
The Tool Drop Protection System	208
Tool Kits	202
Tool Pouch	198
Tool Roll	196, 245
Torque Wrench with driving square, reversible	236
TwinForce® – High Performance Diagonal Cutters	99
TwinKey® for all standard cabinets and shut-off systems	192
Twistor16® – Self-Adjusting Crimping Pliers	186
Universal Dismantling Tools	49
Universal Grip Pliers	70
Universal Key "Construction"	194
Universal Key for all standard cabinets and shut-off systems	194
Universal Tool Case	246
Vinyl Shears for cable ducts	156
Water Pump Pliers	138, 142, 220
Water Pump Pliers with automatic adjustment	125
Welding Grip Pliers	72
Wire Rope Cutter	169
Wire Rope Shears	168
Wire Stripping Tweezers – Coated	46
X-Cut® – Compact Diagonal Cutter	98, 219

BASIC SHAPES OF THE JAWS

flat jaws

half-round jaws

round jaws

Cutting Pliers
for cutting or nipping (diagonal, centre and end cutters, carpenters' pincers, etc.)

Gripping Pliers
(flat-, long-nose and water pump pliers, etc.)

JOINT CONNECTIONS

**Forged-in joint axle**

The rivet is part of one handle (forged from one piece)
> high stability for highest strain
> long service life

**Joint with inserted rivet**

A proven, sturdy and precise rivet connection for all standard pliers.

**Bolted joint**

For particularly demanding requirements in terms of precision and smooth operation, e.g. in circlip pliers and cable shears (even the finest multi-stranded conductors have to be cut cleanly).

Combined Pliers
for cutting and gripping (combination, stork beak and radio pliers, etc.)

Special Pliers
for special applications, e.g. notching or punching different types of materials (sheet-metal nibbler, tile nibbling pincers, etc.)

TYPES OF JOINTS

Lap joint

The two pliers halves lie on top of each other but are not milled out.

**Single joint**

Half the thickness in each pliers handle is milled away in the joint area so that both handles can be laid into each other.

**Box joint**

One handle on the pliers is slit. The other handle is pushed through this slot. This joint connection can withstand a high level of load and strain because the joint bolt is supported on both sides and the inside handle is guided on both sides.

Safety instructions

- Each tool should only be used for its specified purpose.
- When using cutting pliers: beware of wire ends flying off. Wear protective goggles and – if needed – gloves. Be aware of bystanders!
- Only handles marked with the symbol $\Delta 1000\text{V}$ are insulating.

**Care Tips**

A drop of oil on polished surfaces and in the joint will keep the tool in good working order and will increase the service life of your pliers.

The maximum values always indicate the performance limit under the most favorable cutting conditions, when the wire is placed as near as possible to the joint.

**Direction and position of cutting edges**

Material examples	Type of wire	Tensile strength N/mm ²	Tensile strength kp/mm ²
● Copper, plastics	soft	220	22
● Nail, wire pin	medium-hard	750	75
● Wire rope strand, steel wire	hard	1800	180
● Spring steel wire	piano wire	2300	230

STRUCTURE OF THE ARTICLE NUMBER HEAD / HANDLES

Basic model e.g.: Combination Pliers	Style e.g.: straight	Finish e.g.: head polished, handles plastic coated	Length e.g.: 180 mm
03	0	1	180

0	Pliers black atramentized, head polished	
1	Head polished, handles plastic coated	
2	Head polished, handles with multi- component grips	
3	Pliers chrome plated, handles plastic coated	
4	Pliers chrome plated	
5	Pliers chrome plated, handles with multi- component grips	
6	Pliers chrome plated, handles insulated with multi-component grips VDE-tested DIN EN/IEC 60900	
7	Pliers chrome plated, handles with dipped insulation, VDE tested DIN EN/IEC 60900	
8	Pliers head polished, handles with multi- component grips; ASTM-tested	

SYMBOLS

	flat jaws		with lead catcher		electrostatic discharging, dissipative		weight
	half-round jaws		angle		electronics		length
	round jaws				VDE tested, also in conformance to GPSG (Equipment and Product Safety Act)		
	flat and pointed jaws				insulated according to IEC 60900 and ASTM F1505, usable up to 1000 V AC/1500 V DC		
	box joint		centre cutter		insulated according to DIN VDE 0680/1, suitable for the application up to 1000 V AC / 1500 V DC		soft wire
	bolted joint		cutting edges with bevel		conforms to a European directive		medium hard wire
	smooth gripping surfaces		cutting edges with small bevel		mechanically tested in accordance with the equipment and product safety act		hard wire
	serrated gripping surfaces		cutting edges with very small bevel		WEEE marking (Waste Electrical and Electronic Equipment Directive)		piano wire
	cross-hatched, knurled gripping surfaces		cutting edges without bevel				Cu + Al multi-conductor cable, solid and multi-stranded
	with opening spring		for flush cut of soft materials				wire rope
							iron
							ribbon cable
							steel wire armoured cable (SWA)
