WHY MINERALLAC?

Minerallac provides a comprehensive package of hangers, fasteners, anchors, and safety products and partners with our distributors to deliver time-sensitive and flexible service that maximizes the value of our trusted brands.

The Minerallac Company brands offer:

Minerallac Traditional® offers hangers, straps and beam clamps in more sizes and finishes than any other single source.

Cully™ offers one of the broadest lines of fasteners, anchors, tools and safety products for the industry.

Black Claw™ offers an expansive line of spring steel fasteners.

IMPACT Staples® offers residential and commercial staples.

Redmore® offers staples, nails as well as wire products for the utility market.

Minerallac Strut Fittings and Accessories offers an extensive line of nuts, clamps, fittings, brackets, rollers, hardware, concrete inserts, and post bases

and now...

Minerallac Stainless Steel offers a comprehensive catalog of stainless steel hardware, including: hangers, straps, clamps, nuts, washers, screws, bolts, anchors, couplings, and more in assorted grades of stainless steel.

This comprehensive assembly of products began in 1894 and continues today. This history, combined with our distributor partnerships has given us an understanding of your business and allowed us to address your specific needs in an effective and tangible way through relevant, meaningful solutions at cost-effective prices.

Partner with Minerallac and see why electrical distributors have trusted us with their business for over 120 years.

Quality Since 1894

WHY STAINLESS STEEL?

Stainless steel fasteners are the ideal choice for installations where strength, corrosive or harsh environments, aggressive washdown, sanitization, or water is a factor. They are also perfectly suited to electrical applications because, due to its poor electrical conductivity, the use of stainless steel increases worker safety during installation. Best of all, stainless steel offers these benefits while maintaining a high-quality surface finish.

STRONG

Stainless steel is remarkably strong given its flexibility. It can withstand extended periods of extreme temperatures.

WITHSTANDS HARSH/CORROSIVE ENVIRONMENTS AND AGGRESSIVE WASHDOWN

Resistant to many corrosive or abrasive materials, stainless steel can withstand significant environmental abuse while maintaining an attractive finish. Extreme heat or cold, or exposure to high-force water does not impact stainless steel like it would other metals.

RUST-RESISTANT AND SANITARY

Well suited for applications that require frequent cleaning or exposure to liquid, such as hospitals, food handling applications, or laboratories to name a few, stainless steel is resistant to rust and surface damage.

SAFER ALTERNATIVE

Electrical contractors are exposed to electricity as part of the job. Stainless steel is a poor conductor of electricity, making stainless steel fasteners an ideal choice to improve safety.

Stainless Steel Type	Properties
18-8	Most common designation for non-magnetic stainless steel fasteners. Corrosion-resistant.
304	Most popular stainless steel for hex head cap screws. Increased welding capacity. Resists most oxidizing acids and can withstand all ordinary rusting. Non-magnetic.
316	Increased corrosion resistance to chloride and sulfides. Increased welding capacity. Non-magnetic.
410	Increased strength. Ideal for highly stressed conditions. Magnetic.
