

Features and Benefits:

- Special interlocking joints provide water-tight seal
- Packaging includes easy to follow instruction sheet
- Ideal for the repair of Sch40 and Sch80 PVC conduit in electrical applications.
- Enhanced resistance to UV light
- Restores structural integrity of conduit system
- Cost savings with fast and easy installation
- Compatibility – inside diameter of bell equals outside diameter of pipe to create a bell and spigot connection

EPR Conduit Repair Kits

These clever and innovative conduit repair kits from Kraloy offer fast and easy repairs for damaged conduit caused by actions such as earth excavation, horizontal and core drilling.

Designed with a unique interlocking joint, the EPR Kits' two half shell, bell by bell pieces simply close around the installed wire and cable. Using standard PVC solvent cement, EPR Kits are quickly and easily assembled and connected, restoring the conduit to its original form. And, unlike other conduit repair systems, EPR Kits are capable of repairing various lengths and types of pipe quickly and accurately, saving you time and money.

Manufactured from high-impact and non-conductive PVC, the EPR Kits closely match the color of our conduit and fittings and offer enhanced resistance to UV light.

NOTE: Installation instructions are provided with each EPR kit.
