

# Safety Padlocks and Kits

Safety is an essential element of risk mitigation throughout the physical infrastructure. Panduit long body non-conductive padlocks are designed specifically for lockout/tagout applications to help reduce the risk of electrical hazards while providing high security. All Panduit lockout kits, lockout stations, and the group lockout box are designed for use with non-conductive padlocks, contributing to the protection of employees from unexpected hazards while meeting safety and regulatory requirements. In addition, Panduit offers high security and custom keyed padlocks for application flexibility. These are part of a comprehensive line of safety and facility identification products to optimize workplace safety and aid in compliance.

## Key Features

## Benefits

<p><b>Multiple padlock styles available</b></p>	<p>Comprehensive line of padlocks provides application flexibility for enhanced workplace safety</p> <p>Compact aluminum padlocks can be used for lockout operations in tight areas</p>
