Recessed TV Box with Low-Voltage Pull-Through Brushes

L legrand®
Pass & Seymour

November 2011

Today's homeowners have more multimedia choices than ever — including flat panel, wall-mounted televisions. P&S Recessed TV Boxes offer a clean installation, in new or existing walls, with the versatility to handle up to 12 multimedia connections in a single box. Their recessed design saves space and simplifies connections to cable or satellite boxes, DVRs, DVD players, surround-sound systems and more. And they're available with or without TVSS receptacles to protect costly electronics from potentially damaging surges.

Features & Benefits

– Clean, flush-mount appearance — snap-on end caps hide mounting screws.
– Flexible — position either line voltage or low voltage in all three openings.
– Plugs and multimedia connections stay recessed behind the wall surface.
– Molded-in template and rectangular cut-out.
– Accepts standard TP wall plates.
– Metal swing brackets ensure a solid mounting.
– Uses old-work-style boxes for line voltage.
– Pass-thru brush permits low-voltage cables while keeping out dust and drafts.
– Does not require low-voltage terminations — a single cable can connect the source to components.
– One piece box/frame design offers a clean, simplified look.
– Install in existing walls.
