

RAB®

C-WRAP

C-WRAP linear wrap.

The future of lighting is sustainable.

Major strides in sustainability.

The C-WRAP's unique housing is composed of biorenewable material that includes seashells, coffee chaff, and recycled plastic. We've also put this wrap on a seriously green diet, reducing its size by up to 30% compared to other standard wraps.

100,000-HOUR LED LIFESPAN

0-10V DIMMING

5-YEAR NO-COMPROMISE WARRANTY

RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty

Field adjustability means fewer SKUs to manage.

Both sizes of the C-WRAP offer selectable color temperature and wattage to provide a complete portfolio with just two models.

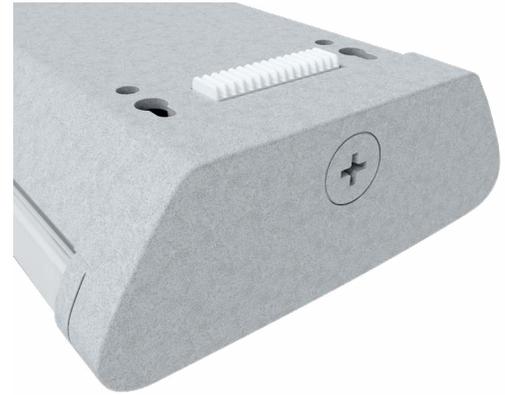

Thoughtful design for easy installs.

Engineered to make installations a breeze, the C-WRAP's lens and LED board gently drop down together, eliminating the need to remove the board while wiring. Once you're done, just snap the quick-release tab shut!

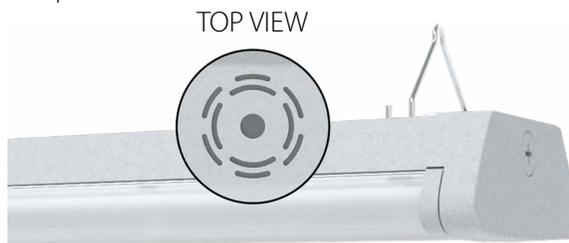

It's all in the details.

The lens was designed to partly cover the endcaps and create a seamless look, and soft rubber bumpers help keep the C-WRAP from damaging textured ceilings.

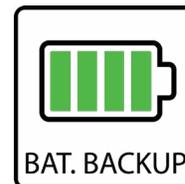

Versatile mounting.

The C-WRAP can be mounted to surface, junction box, or chains. Hardware is included for all options.

Additional Options.

The C-WRAP is available with an optional battery backup and/or an internal microwave sensor.
