Installation

- 1 A 3/4" conduit is required for routing the cables with waterproof connection. The cable gland and conduit are user-supplied.
- 3 Install the cable gland and pass cables through it.

- 2 Attach the included alignment sticker to a preferred position. Drill holes on the wall and install the junction box. If space behind the wall allows, you may also pass cables through the wall.
- 4 Connect the tether wire between camera and box.

The drawing takes IB9365 as an example. The combo cables are not shown here for the simplicity reason.

- 5 Connect cables and all wirings.

- 7 Connect the ground wire to a proper grounding point.

- 6 Secure the camera to box using the hex socket screws.

- 8 Open a live view console and adjust the shooting direction. Refer to the camera's QIG for more information.
