

1 DEVICE.

FOR EVOLVING
SPACES.

1 DEVICE

WORKS IN EVERY SPACE.

New heights are attainable when innovation is rooted in the framework of your building. A small environment can feel larger and a large environment can be more efficient. But where do you look to find such high-level change and innovation? The floor. When you install an Evolution Series Poke-Thru Device.

Enormous capacity, coupled with unique versatility, makes the Evolution Series Poke-Thru Device a highly capable tool for evolving spaces in new or retrofit construction. From open offices to conference rooms, lecture halls to common areas, it stands up to the most demanding applications and can handle all of your power, communications and A/V connections.

When you require innovation infused into every layer of your environment, the right place to start is right at your feet.

1 DEVICE

EASIER
TO USE.

A strong, durable hinge allows the cover to easily open and close.

Sliding, auto-close egress doors lock into position when open and automatically adjust to cables when closed.

Symmetrical design with a tough and durable finish.

Meets ADA Standard 4.5.

Built-in, easy-to-use handle opens the cover 180° for greater accessibility. It also ensures the cover closes easily, so there's less risk of tripping.

Recessed Devices Provide Maximum Protection –
All power, communications and A/V devices are recessed below floor level, providing device longevity.

Open System for Expanded Compatibility –
Accepts industry standard power, communications and A/V devices from most manufacturers including Legrand AVIP, Extron® and more.

Two-Hour Fire Rating – Uses an intumescent material that maintains the fire rating of any floor for up to two hours.

Plug Load Control up to 30 Feet – Tested with Pass & Seymour® Wireless RF receptacles to control plug loads up to a distance of 30 feet when the cover is closed.

Nine finishes are available to ensure the device will seamlessly match your environment.

DURABLE FINISHES					POWDER COAT FINISHES			
Satin Brass	Satin Nickel	Brushed Aluminum	Aluminum	Nickel	Brass	Gray	Bronze	Black

IDEAL
CAPACITY.

4" DEVICE

2-gangs of capacity

6" DEVICE

3-gangs of capacity

8" DEVICE

5-gangs of capacity

10" DEVICE

AN INDUSTRY FIRST: 8-gangs of capacity in the largest poke-thru ever

The generous internal wiring capacity of the 10" device simplifies future changes and doesn't require an external junction box - wiring is done right inside the unit.
